Type of Review: Emergency.

Title: Report of Children and Youth with Disabilities Receiving Special Education Under Part B of Individuals with Disabilities Education Act.

Abstract: This package provides instructions and forms necessary for States to report the number of children with disabilities served under IDEA-B receiving special education and related services. It serves as the basis for distributing Federal assistance, monitoring, implementing, and Congressional reporting.

Additional Information: This form provides instructions and information for States to submit a count of children and youth with disabilities receiving special education and related services. This information is used by the Office of Special Education Programs (OSEP) as the basis for providing Federal assistance to States. In addition, OSEP uses this information to assist in establishing programmatic priorities (such as expanding or adapting services for students with serious emotional disturbance), to monitor States to ensure compliance with Federal statute and regulations, and to disseminate data to Congress and the public.

Emergency clearance is requested on the basis of a statutory deadline. Revisions to the form were necessitated by the passage of P.L. 105-17, the Individuals with Disabilities Education Act Amendments of 1997. While the data collection requirements (Section 618) of this law do not go into effect until July 1, 1998, two sections of the law—Section 602 and Section 611—which impact the 1997 data collection went into effect on June 4, 1997. Therefore, this emergency clearance must be effective for the statutory collection of child count data on October 31 or December 1, 1997.

Frequency: Annually.

Affected Public: State, local or Tribal Gov't, SEAs or LEAs

Annual Reporting and Recordkeeping Hour Burden:

Responses: 58.

Proposed Information Collection and Request for Comments

August 15, 1997.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of proposed information collection and request for comments.

SUMMARY: In compliance with the requirements of Section 3506(c)(2)(a) of the Paperwork Reduction Act of 1995 (Pub. L. 104-13), the Federal Energy Regulatory Commission (Commission) is soliciting public comment on the specific aspects of the information collection described below.

DATES: Comments are due October 20, 1997.

ADDRESSES: Copies of the proposed collection of information can be obtained from and written comments may be submitted to the Federal Energy Regulatory Commission, Attn: Michael P. Miller, Information Services Division, ED-12.4, 888 First Street N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Michael P. Miller may be reached by telephone at (202) 208-1415, by fax at (202) 273-0873, and by e-mail at mmiller@ferc.fed.us.

SUPPLEMENTARY INFORMATION: The information collected under the requirements of FERC-511 "Application for Transfer of License" (OMB No. 1902-0069) is used by the Commission to implement the statutory provisions of Part I, Sections 4(e) and 8 of the Federal

Power Act (FPA) 16 U.S.C. 792-828c. Section 4(e) authorizes the Commission to issue licenses for the construction, operation and maintenance of reservoirs, power houses and transmission lines or other facilities necessary for development and improvement of navigation and for the development, transmission, and utilization of power from bodies of water Congress has jurisdiction over. Section 8 of the FPA provides that the voluntary transfer of any license can only be made with the written approval of the Commission. Any successor to the licensee may assign the rights of the original licensee but is subject to all of the conditions of the license. The information filed with the Commission is a mandatory requirement contained

in the format of a written application for transfer of license, executed jointly by the parties to the proposed transfer. The transfer of a license may be occasioned by the sale or merger of a licensed hydroelectric project. It is used by the Commission's staff to determine the qualifications of the proposed transferee to hold the license, and to prepare the transfer of the license order. The Commission implements these filing requirements in the Code of Federal Regulations (CFR) under 18 CFR Part 9.

Action: The Commission is requesting a three-year extension of the current expiration date, with no changes to the existing collection of data.

Burden Statement: Public reporting burden for this collection is estimated as:

	Number of respondents annually (1)	Number of responses per respondent (2)	Average burden hours per response (3)	Total annual burden hours (1) x (2) x (3)
23		1	40	920

Estimated cost burden to respondents: 920 hours / 2,087 hours per year x \$110,000 per year = \$48,491. The cost per respondent is equal to \$2,108.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information

is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology e.g. permitting electronic submission of responses.

Linwood A. Watson, Jr.,

Acting Secretary.
