Bonneville Power Administration

Upper Grande Ronde Supplementation Program

AGENCY: Bonneville Power Administration (BPA), Department of Energy (DOE).

ACTION: Notice of Floodplain and Wetlands Involvement.

SUMMARY: This notice announces BPA's proposal to construct acclimation ponds for the Grande Ronde River spring chinook in floodplain and wetlands located in Union and Wallowa Counties, Oregon. A total of three acclimation sites would be developed in the Upper Grande Ronde River, the Lostine River and Catherine Creek tributaries within the Grande Ronde Subbasin of the Snake River Drainage in northeastern Oregon. It is the intent of the BPA, the Nez Perce Tribe, the Confederated Tribes of the Umatilla Indian Reservation, the Oregon Department of Fish and Wildlife, and the National Marine Fisheries Service to prevent the extinction and restore the population of the spring chinook within the tributaries.

In accordance with DOE regulations for compliance with floodplain and wetlands environmental review requirements, BPA will prepare a floodplain and wetlands assessment and would perform this proposed action in a manner so as to avoid or minimize potential harm to or within the affected floodplain and wetlands. The assessment will be included in the environmental assessment being prepared for the proposed project in accordance with the requirements of the National Environmental Policy Act. A floodplain statement of findings will be included in any finding of no significant impact that may be issued following the completion of the environmental assessment.

DATE: Comments are due to the address below no later than November 7, 1997.

ADDRESS: Submit comments to Communications, Bonneville Power Administration—ACS-7, P.O. Box 12999, Portland, Oregon 97212. Internet address: comment@bpa.gov.

FOR FURTHER INFORMATION, CONTACT: Kenneth C. Kirkman, EC-4, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon, 97208-3621, phone number 503-230-5557, fax number 503-230-4089.

SUPPLEMENTARY INFORMATION: The juvenile spring chinook captive broodstock acclimation facilities most likely would be located on floodplains and/or wetlands because they need to be
