

# Rules and Regulations

Federal Register

Vol. 62, No. 207

Monday, October 27, 1997

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## FEDERAL RESERVE SYSTEM

### 12 CFR Parts 207, 220, 221 and 224

[Regulations G, T, U and X]

#### Securities Credit Transactions; List of Marginable OTC Stocks; List of Foreign Margin Stocks

**AGENCY:** Board of Governors of the Federal Reserve System.

**ACTION:** Final rule; determination of applicability of regulations.

**SUMMARY:** The List of Marginable OTC Stocks (OTC List) is composed of stocks traded over-the-counter (OTC) in the United States that have been determined by the Board of Governors of the Federal Reserve System to be subject to the margin requirements under certain Federal Reserve regulations. The List of Foreign Margin Stocks (Foreign List) is composed of foreign equity securities that have met the Board's eligibility criteria under Regulation T. The OTC List and the Foreign List are published four times a year by the Board. This document sets forth additions to and deletions from the previous OTC List and the previous Foreign List.

**EFFECTIVE DATE:** November 10, 1997.

**FOR FURTHER INFORMATION CONTACT:** Peggy Wolfrum, Securities Regulation Analyst, Division of Banking Supervision and Regulation, (202) 452-2781, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. For the hearing impaired only, contact Dorothea Thompson, Telecommunications Device for the Deaf (TDD) at (202) 452-3544.

**SUPPLEMENTARY INFORMATION:** Listed below are the deletions from and additions to the Board's OTC List, which was last published on July 28, 1997 (62 FR 40257), and became effective August 11, 1997. A copy of the complete OTC List is available from the Federal Reserve Banks.

The OTC List includes those stocks traded over-the-counter in the United States that meet the criteria in Regulations G, T and U (12 CFR Parts 207, 220 and 221, respectively). This determination also affects the applicability of Regulation X (12 CFR Part 224). These stocks have the degree of national investor interest, the depth and breadth of market, and the availability of information respecting the stock and its issuer to warrant regulation in the same fashion as exchange-traded securities. The OTC List also includes any OTC stock designated for trading in the national market system (NMS security) under rules approved by the Securities and Exchange Commission (SEC). Additional OTC stocks may be designated as NMS securities in the interim between the Board's quarterly publications. They will become automatically marginable upon the effective date of their NMS designation. The names of these stocks are available at the SEC and at the National Association of Securities Dealers, Inc. and will be incorporated into the Board's next quarterly publication of the OTC List.

Also listed below are the deletions from and additions to the Foreign List, which was last published on July 28, 1997 (62 FR 40257), and became effective August 11, 1997. A copy of the complete Foreign List is available from the Federal Reserve banks.

#### Public Comment and Deferred Effective Date

The requirements of 5 U.S.C. 553 with respect to notice and public participation were not followed in connection with the issuance of this amendment due to the objective character of the criteria for inclusion and continued inclusion on the Lists specified in 12 CFR 207.6(a) and (b), 220.17(a), (b), (c) and (d), and 221.7(a) and (b). No additional useful information would be gained by public participation. The full requirements of 5 U.S.C. 553 with respect to deferred effective date have not been followed in connection with the issuance of this amendment because the Board finds that it is in the public interest to facilitate investment and credit decisions based in whole or in part upon the composition of these Lists as soon as possible. The Board has

responded to a request by the public and allowed approximately a two-week delay before the Lists are effective.

#### List of Subjects

##### 12 CFR Part 207

Banks, Banking, Credit, Margin, Margin requirements, National Market System (NMS Security), Reporting and recordkeeping requirements, Securities.

##### 12 CFR Part 220

Banks, Banking, Brokers, Credit, Margin, Margin requirements, Investments, National Market System (NMS Security), Reporting and recordkeeping requirements, Securities.

##### 12 CFR Part 221

Banks, Banking, Credit, Margin, Margin requirements, National Market System (NMS Security), Reporting and recordkeeping requirements, Securities.

##### 12 CFR Part 224

Banks, Banking, Borrowers, Credit, Margin, Margin requirements, Reporting and recordkeeping requirements, Securities.

Accordingly, pursuant to the authority of sections 7 and 23 of the Securities Exchange Act of 1934, as amended (15 U.S.C. 78g and 78w), and in accordance with 12 CFR 207.2(k) and 207.6 (Regulation G), 12 CFR 220.2 and 220.17 (Regulation T), and 12 CFR 221.2(j) and 221.7 (Regulation U), there is set forth below a listing of deletions from and additions to the OTC List and the Foreign List.

BILLING CODE 6210-01-P

**DEPARTMENT OF TRANSPORTATION****Federal Aviation Administration****14 CFR Part 39**

[Docket No. 96-CE-17-AD; Amendment 39-10173; AD 97-22-02]

RIN 2120-AA64

**Airworthiness Directives; Pilatus Britten-Norman Ltd. Models BN-2, BN-2A, BN-2B, and BN-2T Series Airplanes**

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new airworthiness directive (AD) that applies to Pilatus Britten-Norman Ltd. (PBN) BN-2, BN-2A, BN-2B, and BN-2T series airplanes. This action requires modifying the upper engine mounting brackets on the wing front spar as terminating action for the repetitive inspections that were required in AD 84-23-06. AD 84-23-06 is being revised in a separate action, deleting the Pilatus BN-2, BN-2A, BN-2B, and BN-2T series airplanes from its applicability. This AD is prompted by several reports of cracks in the upper engine mounting brackets and a new terminating action to eliminate the repetitive inspections for Pilatus BN-2, BN-2A, BN-2B, and BN-2T series airplanes. The actions specified by this AD are intended to prevent the failure of the upper engine mounting brackets on the wing mounted engines, which could possibly cause structural failure of the airplane.

**DATES:** Effective November 24, 1997.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 24, 1997.

**ADDRESSES:** Service information that applies to this AD may be obtained from Pilatus Britten-Norman Ltd., Bembridge, Isle of Wight, United Kingdom PO35 5PR; telephone 44-19-83-872511; facsimile 44-19-83-873246. This information may also be examined at the Federal Aviation Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket 96-CE-17-AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Mr. S. M. Nagarajan, Project Officer, Small Airplane Directorate, Aircraft Certification Service, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64105; telephone (816) 426-6932; facsimile (816) 426-2169.

**SUPPLEMENTARY INFORMATION:****Events Leading to the Issuance of This AD**

A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an AD that would apply to Pilatus BN-2, BN-2A, BN-2B, and BN-2T series airplanes was published in the **Federal Register** on March 10, 1997 (62 FR 10754). The action proposed to require initially inspecting the upper engine mounting brackets on the wing mounted engines for:

(1) Cracks at the bolt-holes,

(2) Elongation of the bolt holes,  
(3) Fretting within the holes,  
(4) Cracks at the rivet holes,  
(5) Distortion or delamination of the lugs, and that

(6) The bearings are the correct length and the bolts are not threadbound.

If there is no evidence of damage or defects similar to any of the above-mentioned items, the proposed AD would require repetitive inspections at regular intervals until the accumulation of 2,000 hours time-in-service after the effective date of the AD, at which time the AD would require accomplishing Pilatus Modification NB/M/1147.

If any damage or defects are found similar to any of the six items previously mentioned, this action would require immediately accomplishing Pilatus Modification NB/M/1147. This modification consists of replacing damaged brackets, bolts, and bushes with parts of an improved design. Accomplishing this modification is considered a terminating action to the repetitive inspections. Accomplishment of the AD would be in accordance with Pilatus Britten-Norman Service Bulletin No. BN-2/SB.61, Issue 5, dated December 9, 1981.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public.

**The FAA's Aging Aircraft Policy**

The FAA has determined that reliance on critical repetitive inspections on aging commuter-class airplanes carries an unnecessary safety risk when a design change exists that could eliminate or, in certain instances, reduce the number of those critical inspections. In determining what inspections are critical, the FAA considers (1) the safety consequences if the known problem is not detected during the inspection; (2) the probability of the problem not being detected during the inspection; (3) whether the inspection area is difficult to access; and (4) the possibility of damage to an adjacent structure as a result of the problem.

These factors have led the FAA to establish an aging commuter-class aircraft policy that requires incorporating a known design change when it could replace a critical repetitive inspection.

For Pilatus BN-2, BN-2A, BN-2B, and BN-2T series airplanes, the manufacturer has incorporated a design change that would replace damaged bolts, brackets, and bushes with parts of improved design, which would
