

The normal gene and its mutations may also be useful for studying and controlling inflammation.

Methods for Inactivating Enveloped RNA Virus Particles and Compositions for Use Therewith

HF Rosenberg, JB Domachowski (NIAID)

Serial Number: 60/052,986 filed 02 Jul 97

Licensing Contact: Robert Benson, 301/496-7056 ext. 267

The inventors have discovered that treatment of enveloped single-stranded RNA viruses with eosinophil-derived neurotoxin (EDN), a ribonuclease, inactivates the viruses in cell culture. Respiratory Syncytial Virus (RSV) and Parainfluenza Virus (PIV) are medically the most important enveloped RNA viruses; together they hospitalize over 100,000 infants per year in the US. EDN is the major eosinophil ribonuclease. It has been cloned and recombinant EDN is available. Despite its name, EDN is not toxic to respiratory epithelial or other somatic cells. Both parenteral and aerosol administration are contemplated. Claimed are methods of treatment and pharmaceutical compositions.

Actinomycin D: A New Use for AIDS Therapy

JG Levin, J Guo (NICHD)

Serial No. 60/047,223 filed 20 May 97

Licensing Contact: Robert Benson, 301/496-7056 ext. 267

This invention is a method of treating HIV infection by administering Actinomycin D. In a broader sense the invention is the discovery of a new target for anti-HIV therapy, namely the inhibition of the first strand transfer step in reverse transcription, an early step in HIV replication. Actinomycin D, a licensed drug used to treat Wilm's tumor, inhibits the first strand transfer step at a concentration estimated to be an order of magnitude lower than that used to treat cancer, as shown by inhibition studies with purified reverse transcriptase and detergent-treated HIV virions.

Rapid Method for Diagnosing the Various Forms of Alpha-Thalassemia

GP Rodgers, DC Tang (NIDDK)

Serial No. 60/031,880 filed 27 Nov 96

Licensing Contact: J. Peter Kim, 301/496-7056 ext. 264

The present invention is directed to a simple, inexpensive, and rapid method for detecting thalassemias. The present invention provides for the identification of nucleic acid primers capable of

detecting and distinguishing between the various forms of alpha-thalassemia using any biological material (dry or fluid) containing nucleic acid material. The invention further provides for a method and diagnostic kit for the detection and quantitation of hemoglobin (Hb) alpha gene(s) in alpha-thalassemia patients, a method and kit for screening for carriers of this genetic disorder, a sensitive non-radioisotopic test capable of differentiating between the various forms of thalassemia, and a means to identify persons who are at risk of having offspring with homozygous alpha-thalassemia.

Dated: November 4, 1997.

Barbara M. McGarey,

Deputy Director, Office of Technology Transfer.

National Institutes of Health

National Institute of Child Health and Human Development; Notice of Meeting of the National Advisory Board on Medical Rehabilitation Research

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the meeting of the National Advisory Board on Medical Rehabilitation Research, National Institute of Child Health and Human Development, November 24-25, 1997, Natcher Conference Center, Conference Rooms E1-E2, Bethesda, Maryland.

The meeting will be open to the public from 8:00 a.m. to 5:00 p.m. on November 24 and 8:00 a.m. to adjournment on November 25. Attendance by the public will be limited to space available. Board topics will include: (1) A report on fiscal issues concerning the National Center for Medical Rehabilitation Research (Center) and the Institute; (2) reports on the program activities of the Center; (3) a discussion of general priority areas of research for the Center; and (4) a discussion of support for medical rehabilitation research by government agencies.

Ms. Debbie Welty, Board Secretary, NICHD, 6100 Building, Room 2A03, National Institutes of Health, Bethesda, Maryland 20892, Area Code 301-402-2242, will provide a summary of the meeting and a roster of Advisory Board members as well as substantive program

information. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Ms. Welty.

Dated: November 6, 1997.

LaVerne Y. Stringfield,

Committee Management Officer, NIH.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Cancer Institute; Notice of Closed Meeting

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following National Cancer Institute Special Emphasis Panel (SEP) meeting:

Name of SEP: Cancer Drug Discovery: Diversity Generation and Smart Assays.

Date: December 14-16, 1997.

Time: December 14-7:00 p.m. to Recess, December 15-8:00 a.m. to Recess, December 16-8:00 a.m. to Adjournment.

Place: Key Bridge Marriott, 1401 Lee Highway, Arlington, VA 22209.

Contact Person: Ray Bramhall, Ph.D., Scientific Review Administrator, National Cancer Institute, NIH, Executive Plaza North, Room 643, 6130 Executive Boulevard, MSC 7407, Bethesda, MD 20892-7407, Telephone: 301/496-3428.

Purpose/Agenda: To review, discuss and evaluate grant applications.

The meeting will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.
