

demonstration of compliance with: (1) the certification requirements of section 85.1406, including whether the testing accurately substantiates the claimed emission reduction or emission levels; and, (2) the requirements of section 85.1407 for a notification of intent to certify.

EPA requests that those commenting also consider these regulatory requirements, plus provide comments on any experience or knowledge concerning: (a) problems with installing, maintaining, and/or using the candidate equipment on applicable engines; and, (b) whether the equipment is compatible with affected vehicles.

The date of this document initiates a 45-day period during which EPA will accept written comments relevant to whether or not the equipment described in the NOPEC notification of intent to certify should be certified pursuant to the urban bus retrofit/rebuild regulations. Interested parties are encouraged to review the notification of intent to certify and provide comment during the 45-day period. Please send separate copies of your comments to each of the above two addresses.

Additionally, EPA is aware that the biodiesel industry is working to address other regulatory issues related to the EPA's fuel and fuel additive requirements under 40 CFR part 79. Today's **Federal Register** document applies to the limited context of the urban bus program, and is not intended to set precedent as a generic definition of "biodiesel."

EPA will review this notification of intent to certify, along with comments received from interested parties, and attempt to resolve or clarify issues as necessary. During the review process, EPA may add additional documents to the docket as a result of the review process. These documents will also be available for public review and comment within the 45-day period.

involuntarily displaced by an MDS applicant, that the MDS applicant files the appropriate application for suitable alternative spectrum. The applications that would be used would be the FCC 327 (3060-0055) and the FCC 330 (3060-0062). The burdens for these involuntarily displaced ITFS are included in the estimates for the FCC 327 and 330. Additionally, Section 74.902(i) requires that a copy of this application be served on the ITFS licensee to be moved.
