DEPARTMENT OF THE INTERIOR

Office of the Assistant Secretary— Water and Science; Central Utah Project Completion Act

AGENCY: Office of the Assistant Secretary—Water and Science, Department of the Interior.

ACTION: Notice of intent to negotiate a contract between the Strawberry Water Users Association (SWUA) and the Department of the Interior for the conversion of a portion of Strawberry Valley Project (SVP) water from irrigation to municipal and industrial (M&I) use.

SUMMARY: The SVP, authorized December 15, 1905, is one of the earliest Reclamation Projects. The SVP stores water from the Colorado River Basin in the Strawberry Reservoir. The stored water is then conveyed through the Syar Tunnel/Sixth Water Aqueduct into the Great Basin where it is delivered through natural stream courses to a Spanish Fork River diversion structure and into the Strawberry Service Canal. The SVP service area is located in south Utah County, Utah. The SWUA has operational responsibilities for the SVP and contractually uses Central Utah Project (CUP) facilities to store and convey SVP water.

Suburban development in the SVP service area has resulted in agricultural land being taken out of production, annexed into the cities, and developed into residential areas. Under the authority of the Water for Miscellaneous Purposes Act of 1920 (43 U.S.C. 521), the Secretary of Interior has authority to approve converting a portion of the SVP water from irrigation to M&I use. This conversion will: (1) Allow the SWUA to provide M&I water to the cities in south Utah County; (2) ensure the orderly marketing of CUP and SVP M&I water; (3) provide an adequate water supply to the cities; (4) generate revenue to fund the rehabilitation of SVP facilities; and (5) eliminate unauthorized use of SVP water within the service area. Of the total SVP annual average water supply of about 71,000 acre-feet, 7,000 to 8,000 acre-feet of SVP water presently appurtenant to non-agricultural lands will be converted from irrigation to M&I use in the near future with the opportunity to gradually convert

additional amounts as growth continues in the area.

The negotiation process will define the terms and conditions whereby the conversion of SVP water from irrigation to M&I use will be allowed.

DATES: Dates for public negotiation sessions will be announced in local newspapers.
