**FOR FURTHER INFORMATION CONTACT:** Ms. Susan L. Schneider, (703) 602-0131.

**SUPPLEMENTARY INFORMATION:****A. Background**

This interim rule amends DFARS 219.702 to reflect revisions made to the DoD Test Program for Negotiation of Comprehensive Small Business Subcontracting Plans. The revisions to the test program implement Section 822 of the National Defense Authorization Act for Fiscal Year 1998 (Pub. L. 105-85). Section 822 extends, from September 30, 1998, to September 30, 2000, the expiration date for the test program; and provides for use of comprehensive subcontracting plans by participating contractors that are performing as subcontractors under DoD contracts.

The revised DoD test plan is published in the Notices section of this issue of the **Federal Register**.

**B. Regulatory Flexibility Act**

The interim rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because small businesses are exempt from subcontracting plan requirements, and the rule does not change the obligation of large business concerns to maximize subcontracting opportunities for small business concerns. An initial regulatory flexibility analysis has therefore not been performed. Comments are invited from small businesses and other interested parties. Comments from small entities concerning the affected DFARS subpart also will be considered in accordance with 5 U.S.C. 610. Such comments should be submitted separately and should cite DFARS Case 97-D323 in correspondence.

**C. Paperwork Reduction Act**

The Paperwork Reduction Act does not apply because the interim rule does not impose any information collection requirements that require Office of Management and Budget approval under 44 U.S.C. 3501, *et seq.*

**D. Determination To Issue an Interim Rule**

A determination has been made under the authority of the Secretary of Defense that urgent and compelling reasons exist to publish this interim rule prior to affording the public an opportunity to comment. This interim DFARS rule reflects changes to the Test Program for Negotiation of Comprehensive Small Business Subcontracting Plans, as required by Section 822 of the National Defense Authorization Act for Fiscal Year 1998 (Pub. L. 105-85). Section 822 was effective upon enactment on November 18, 1997. Comments received in response to the publication of this interim rule will be considered in formulating the final rule.

RIN 1018-AE83

**Endangered and Threatened Wildlife and Plants; Proposed Reclassification From Endangered to Threatened Status for the Mariana Fruit Bat From Guam, and Proposed Threatened Status for the Mariana Fruit Bat From the Commonwealth of the Northern Mariana Islands**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Proposed rule.

**SUMMARY:** The U.S. Fish and Wildlife Service (Service) proposes reclassification from endangered to threatened status pursuant to the Endangered Species Act of 1973, as amended (Act), for the Mariana fruit bat (*Pteropus mariannus mariannus*) from Guam, and threatened status pursuant to the Act for the Mariana fruit bat from the Commonwealth of the Northern Mariana Islands (CNMI). This subspecies is restricted to the Mariana archipelago, comprised of the Territory of Guam and the CNMI. The Mariana fruit bat is listed as endangered on Guam, and the populations on the southern islands of the CNMI (Aguijan, Tinian, and Saipan) are candidates for listing. Recent evidence suggests that inter-island movement between Guam and other islands throughout the archipelago is not a rare event; hence,

the Mariana fruit bats on Guam are no longer believed to represent a population distinct from those in the CNMI. Similarly, the populations of Aguijan, Tinian, and Saipan are not believed to be distinct from one another or from populations on other islands in the archipelago. Therefore, for the purposes of this proposed rule, all Mariana fruit bats in the Mariana Island archipelago are considered to represent one population. Mariana fruit bats are known from all of the islands of the Mariana archipelago, and throughout this range they are threatened by illegal hunting, degradation and loss of habitat from feral animals and through the development of forested areas, the potential for extinction of subpopulations from naturally occurring events such as typhoons, and predation by the brown tree snake. This proposal, if made final, would implement the protection provisions provided by the Act.

**DATES:** Comments from all interested parties must be received by May 26, 1998. Public hearing requests must be received by May 11, 1998.

**ADDRESSES:** Comments and materials concerning this proposal should be sent to Brooks Harper, Field Supervisor, Pacific Islands Office, U.S. Fish and Wildlife Service, 300 Ala Moana Boulevard, Room 3-122, Box 50088, Honolulu, Hawaii 96850. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

**FOR FURTHER INFORMATION CONTACT:** Karen Rosa, Assistant Field Supervisor-Endangered Species, Pacific Islands Office, at the above address (telephone 808/541-3441, FAX 808/541-3470).

**SUPPLEMENTARY INFORMATION:**

**Background**

The Mariana Islands archipelago consists of the 15-island Commonwealth of the Northern Mariana Islands (CNMI) and the Territory of Guam. Both are within the jurisdiction of the United States. This archipelago extends 466 miles (750 kilometers (km)) from 13°14'N, 144°45'W and 20°3'N, 144°54'W and is approximately 932 miles (1,500 km) east of the Philippine Islands. The ten northern islands are volcanic, while the five southern islands are uplifted coral limestone plateaus with volcanic outcrops. Mariana fruit bats have historically inhabited all of these islands. The largest southern islands (Guam, Rota, Tinian, and Saipan) are occupied by approximately 160,000 people.
