

require the collection of information included in the Report of Road Use, it would not be possible to determine payment amounts, ledger account status, or monitor a permittee's compliance with the terms of the permit. The costs for services provided by BLM would not be collected in a timely manner if the frequency of reporting is reduced. This would have a direct effect on the ability of BLM to properly maintain its road system, protect the road investment, and provide safe and efficient access to the public lands.

Based on BLM's experience administering the activities described above, the public reporting burden for the information collected is estimated to average 1 hour per response. The respondents include individuals, partnerships, and corporations engaged in the removal and transportation of timber and other forest products. The frequency of response is quarterly. The number of responses per year is estimated to total 400. The estimated total annual burden on respondents is about 1600 hours. BLM is specifically requesting your comments on its estimate of the amount of time that it takes to prepare a response.

BLM will summarize all responses to this notice and include them in the request for Office of Management and Budget approval. All comments will also become a matter of public record.
