

SUPPLEMENTARY INFORMATION: Funding for this category of SEP Special Projects was offered in the original 1998 Special Projects notice published in the **Federal Register** dated December 4, 1997 (62 FR 64211). Applications received in response to that notice did not cover the total amount of funding available, so DOE is offering States another opportunity to apply for this category of Special Projects.

Availability of Fiscal Year 1998 Funds

With this publication, DOE is announcing the availability of at least \$1,200,000 in financial assistance funds for fiscal year 1998. The awards will be made through a competitive process. The end-use sector program that is participating in this SEP special projects offering for fiscal year 1998, is:

- Utility Technologies: Projects to promote remote applications of solar and renewable energy to reduce or avoid diesel and gasoline power generation.

Restricted Eligibility

Eligible applicants for purposes of funding under this program are limited to the 50 States, the District of Columbia, Puerto Rico, or any territory or possession of the United States, specifically, the State energy or other agency responsible for administering the State Energy Program pursuant to 10 CFR part 420. For convenience, the term State in this notice refers to all eligible State applicants.

The Catalog of Federal Domestic Assistance number assigned to the State Energy Program is 81.041.

Requirements for cost sharing contributions will be addressed in the program guidance/solicitation for the special project activity, as appropriate. Cost sharing beyond any required percentage is desirable.

Any application must be signed by an authorized State official, in accordance with the program guidance/solicitation.

Evaluation Review and Criteria

A first tier review for completeness will occur at the appropriate DOE Regional Support Office. Applications found to be complete will undergo a merit review process by panels comprised of members representing the participating end-use sector program in DOE's Office of Energy Efficiency and Renewable Energy. A decision as to the applications selected for funding will then be made by the Director, Office of State and Community Programs, or designee, based on the findings of the technical merit review and any stated program policy factors. DOE reserves the right to fund, in whole or in part,

any, all or none of the applications submitted in response to this notice.
