

regulation XC81.01(12)(G)(8) will affect a majority of regular shipping stations, but no announcement of the anticipated period of obstruction is made, then shipment may be delayed for the number of days that such impossibility prevails.

XC81.01(12)H Barge Load-Out Rates for Corn—(see 1081.01(12)H)

XC81.01(13) Location—For the delivery of corn, regular warehouses or shipping stations may be located within the Chicago Switching District or within the Burns Harbor, Indiana Switching District or within the Lockport-Seneca Shipping District, or within the Ottawa-Chillicothe Shipping District or within the Peoria-Pekin Shipping District.

No such warehouse or shipping station within the Chicago Switching District shall be declared regular unless it is conveniently approachable by vessels of ordinary draft and has customary shipping facilities. Ordinary draft shall be defined as the lesser of (1) channel draft as recorded in the Lake Calumet Harbor Draft Gauge, as maintained by the Corps of Engineers, U.S. Army, minus one (1) foot, or (2) 20 feet.

Delivery in Burns Harbor must be made "in store" in regular elevators or by shipping certificate at regular shipping stations providing water loading facilities and maintaining water depth equal to normal seaway draft of 27 feet.

In addition, deliveries of grain may be made in regular elevators or shipping stations within the Burns Harbor Switching District PROVIDED that:

(a) When grain represented by shipping certificates is ordered out for shipment by a barge, it will be the obligation of the party making delivery to protect the barge freight rate from the Chicago Switching District (i.e. the party making delivery and located in the Burns Harbor Switching District will pay the party taking delivery an amount equal to all expenses for the movement of the barge from the Chicago Switching District, to the Burns Harbor Switching District and the return movement back to the Chicago Switching District).

If inclement weather conditions make the warehouse or shipping station located in the Burns Harbor Switching District unavailable for barge loadings for a period of five or more calendar days, the party making delivery will make grain available on the day following this five calendar day period to load into a barge at one mutually agreeable water warehouse or shipping station located in the Chicago Switching District; PROVIDED that the party

making delivery is notified on the first day of that five-day period of inclement weather that the barge is available for movement but cannot be moved from the Chicago Switching District to the Burns Harbor Switching District, and is requested on the last day of this five day calendar period in which the barge cannot be moved.

(b) When grain represented by shipping certificates is ordered out for shipment by vessel, and the party taking delivery is a recipient of a split delivery of grain between a warehouse or shipping station located in Burns Harbor and a warehouse or shipping station in Chicago, and the grain in the Chicago warehouse or shipping station will be loaded onto this vessel; it will be the obligation of the party making delivery at the request of the party taking delivery to protect the holder of the shipping certificates against any additional charges resulting from loading at one berth in the Burns Switching District and at one berth in the Chicago Switching District as compared to a single berth loading at one location. The party making delivery, at his option, will either make the grain available at one water warehouse or shipping station operated by the party making delivery and located in the Chicago Switching District for loading onto the vessel, make grain available at the warehouse or shipping station in Burns Harbor upon the surrender of shipping certificates issued by other regular elevators or shipping stations located in the Chicago Switching District at the time vessel loading orders are issued, or compensate the party taking delivery in an amount equal to all applicable expenses, including demurrage charges, if any, for the movement of the vessel between a berth in the other switching district. On the day that the grain is ordered out for shipment by vessel, the party making delivery will declare the regular warehouse or shipping station in which the grain will be available for loading.

Delivery within the Lockport-Seneca Shipping District, or within the Ottawa-Chillicothe Shipping District or within the Peoria-Pekin Shipping District must be made at regular shipping stations providing water loading facilities and maintaining water depth equal to the draft of the Illinois River maintained by the Corp of Engineers.
