In general, the Act is designed to increase public understanding of environmental issues and problems, and to improve the training of environmental education professionals. EPA will achieve these goals, in part, by awarding grants and/or establishing partnerships with other Federal agencies, state and local education and natural resource agencies, not-for-profit organizations, universities, and the private sector to encourage and support environmental education and training programs. The Council is also responsible for preparing a national biennial report to Congress that will describe and assess the extent and quality of environmental education, discuss major obstacles to improving environmental education, and identify the skill, education, and training needs for environmental professionals.

Clean Air Act Advisory Committee: Accident Prevention Subcommittee Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting.

SUMMARY: The Clean Air Act section 112(r) required EPA to publish regulations to prevent accidental releases of chemicals and to reduce the severity of those releases that do occur. These accidental release prevention requirements build on the chemical safety work begun by the Emergency Planning and Community Right-to-Know Act (EPCRA) which sets forth requirements for industry, State and local governments. On June 20, 1996, EPA published the final rule for risk management programs to address prevention of accidental releases.

An estimated 66,000 facilities are subject to this regulation based on the quantity of regulated substances they have on-site. Facilities that are subject will be required to implement a risk management program at their facility, and submit a summary of this information to a central location specified by EPA. This information will be helpful to State and local government entities responsible for chemical emergency preparedness and prevention. It will also be useful to environmental and community organizations, and the public in understanding the chemical risks in their communities. In addition, we hope the availability of this information will stimulate a dialogue between industry and the public to improve accident prevention and emergency response practices.

The Accident Prevention Subcommittee was created in September 1996 to advise EPA’s Chemical Emergency Preparedness and Prevention Office (CEPPO) on these chemical accident prevention issues, specifically, section 112(r) of the Clean Air Act.

DATES: The Accident Prevention Subcommittee of the Clean Air Act Advisory Committee will hold a public meeting on September 9, 1998 from 8:30 a.m. to 4:30 p.m.

ADDRESSES: The meeting will be held at the Hall of States (Room 383) located at 444 North Capitol St., NW, Washington D.C., near Union Station. Members of the public are welcome to attend in person.
