NUCLEAR REGULATORY COMMISSION

10 CFR Part 70

Public Meeting on Part 70 Rulemaking Activities

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of meeting.

SUMMARY: NRC will host a public meeting in Rockville, Maryland with representatives of the Nuclear Energy Institute (NEI) to discuss the NRC staff's proposed revisions to 10 CFR part 70, "Domestic Licensing of Special Nuclear Material."

NRC staff and NEI representatives briefed the Commission on August 25, 1998, regarding SECY-98-185, "Proposed Rulemaking—Revised Requirements for the Domestic Licensing of Special Nuclear Material," dated July 30, 1998. Although both NRC staff and NEI are in agreement that part 70 should be amended to require the performance of an integrated safety analysis (ISA), disagreements about the details of that proposed requirement were identified at the Commission meeting. At a subsequent public meeting on September 29, 1998, NRC staff and industry representatives discussed some of the issues, but agreed that an additional meeting was needed.

DATES: The meeting is scheduled for December 3-4, 1998, from 9 a.m. to 4 p.m. The meeting is open to the public. Persons with administrative questions concerning this meeting should contact James Hennigan at (301) 415-6850.

ADDRESSES: NRC's Auditorium at Two White Flint North, 11545 Rockville Pike, Rockville, Maryland. Visitor parking around the NRC building is limited; however, the meeting site is located adjacent to the White Flint Station on the Metro Red Line.

FOR FURTHER INFORMATION CONTACT: Theodore S. Sherr, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission,

SUPPLEMENTARY INFORMATION:

Purpose: The purpose of this meeting is for NRC to consider industry's suggestions for specific changes to the language in the SECY-98-185 draft amendment to 10 CFR part 70, and the associated draft standard review plan (SRP). Topics to be addressed are: (1) Next steps in the revision of 10 CFR part 70; (2) chemical safety requirements; (3) SRP issues; (4) criticality safety in relation to risk-informed regulations; (5) the content of the ISA summary; (6) the role of the preliminary ISA in the regulatory process; and (7) other issues identified.
