NATIONAL TRANSPORTATION SAFETY BOARD

Agency Recordkeeping/Reporting Requirements Under Emergency Review by the Office of Management and Budget (OMB)

The National Transportation Safety Board intends to submit the following (see below) emergency processing public information collection request (ICR) to the Office of Management and Budget (OMB) for review and clearance under the paperwork reduction Act of 1995 (P.L. 104-13, 44 U.S.C. Chapter 35). OMB approval is being requested concurrently with this submission. A copy of this individual ICR, with applicable supporting documentation, may be obtained by calling the National Transportation Safety Board Departmental Clearance Officer, Larry Crabill (202) 314-6224. Comments and questions about the ICR listed below should be directed to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the National Transportation Safety Board, Office of Management and Budget, Room 10102, 725 17th Street, N.W., Washington, D.C. 20503.

Agency: National Transportation Safety Board.

Title: Intrastate Truck Study Questionnaire.

OMB Number: New.

Frequency: Once.

Affected Public: Commercial Motor Carriers.

Number of Respondents: 3000.

Estimated time per respondent: 30 minutes.

Total Burden Hours: 1500.

Description: The National Transportation Safety Board is currently conducting a study examining intrastate motor carrier operations and their impact on transportation safety. Commercial motor carriers transport cargo billions of mile each year. Each trip is considered either intrastate or interstate commerce based on the destination of the cargo being transported. While interstate operations are subject to federal regulations, intrastate operations are subject to the laws and regulations of the State in which they occur. There is limited data available regarding intrastate trucking operations and the absence of such data

makes it impossible to identify its impact on safety.

Therefore, the National Transportation Safety Board is seeking clearance to obtain data from motor carriers to evaluate the safety of intrastate operations.

Dated: December 21, 1998.

Federal Register Liaison Officer.

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of renewal of the Advisory Committee on Reactor Safeguards (ACRS).

SUMMARY: The Advisory Committee on Reactor Safeguards was established by Section 29 of the Atomic Energy Act (AEA) in 1954. Its purpose is to provide advice to the Commission with regard to the hazards of proposed or existing reactor facilities, to review each application for a construction permit or operating license for certain facilities specified in the AEA, and such other duties as the Commission may request. The AEA as amended by PL-100-456 also specifies that the Defense Nuclear Safety Board may obtain the advice and recommendations of the ACRS.

Membership on the Committee includes individuals experienced in reactor operations, management; probabilistic risk assessment; analysis of reactor accident phenomena; design of nuclear power plant structures, systems and components; and mechanical, civil, and electrical engineering.

The Nuclear Regulatory Commission has determined that renewal of the charter for the ACRS until December 23, 2000 is in the public interest in connection with the statutory responsibilities assigned to the ACRS. This action is being taken in accordance with the Federal Advisory Committee Act.
