

of delivery and compensating takers of delivery at facilities served by non-Class I railroads for the costs of moving the oil to a Class I railroad.

The CBT further submits that:

The proposed doubling of the maximum annual adjustment in delivery differentials will help ensure that the delivery differentials between territories reflect true cash market differentials. The proposal to limit delivery capacity to 30 times the daily load-out capacity for each regular facility will reduce the period of time over which load-out can occur and give takers of delivery quicker access to delivery stocks. Implementation of the new regulation requiring operators of delivery facilities which are not located on Class I railroads to pay the switching and/or freight costs for making the oil available on the nearest Class I railroad will improve the arbitrage process of the delivery system and facilitate convergence.

Commenters are requested to address the extent to which the proposed amendments reflect cash market practices or conditions. Specifically, will the proposed changes to the annual locational price differential adjustment allow for better conformity with prevailing cash market price differences between delivery territories. Also, will the proposed changes to the rail delivery procedures better reflect the relative value of soybean oil stored in facilities located on Class I railroads relative to soybean oil stored in facilities located on non-Class I railroads. In addition, commenters are requested to assess the overall effect of the proposed amendments on the supply of soybean oil likely to be available for delivery on the contract and whether the proposed amendments will have any effect on the futures contract's susceptibility to price manipulation or distortion.

Copies of the proposed amendments will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581. Copies of the proposed amendments can be obtained through the Office of the Secretariat by mail at the above address, by phone at (202) 418-5100, or via the Internet on the CFTC website at secretary@cftc.gov.

Other materials submitted by the CBT in support of the proposal may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR part 145 (1987)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Act Compliance Staff of the Office of Secretariat at the Commission's

SUPPLEMENTARY INFORMATION:

Background

One of the missions of the Corporation is to "provide opportunities to engage in service that addresses the nation's unmet human, educational, environmental, and public safety needs" (42 U.S.C. 12501(b)). Through the AmeriCorps*State/National program, the Corporation supports the efforts of local, state and national organizations that engage American adults in results-driven community service. Community service efforts include, but are not limited to: providing tutoring and immunization services for pre-school through twelfth grade children, and recruiting and training volunteers in local communities to provide health and independent living assistance to community residents, housing assistance to the homeless, community policing activities, and services to reduce environmental risk.

The Corporation has placed a priority on evaluating the outcomes of these efforts. A primary goal of the Corporation is that communities will be made stronger through the services its programs provide. In addition to outcomes, key considerations in determining a number of policy and programming issues in Corporation programs are program impact and net societal benefit. This data collection will address not only the value that communities place on the outcomes achieved by national service programs, but also whether the outcomes would have occurred in the absence of the programs.

Current Action

The Corporation seeks approval of a survey form for the evaluation of the Corporation's AmeriCorps*State/National programs that it supports through grants. The survey will allow for the enhancement of the Corporation's future efforts in devising methods to measure progress toward its goals. It also may contribute important information to the knowledge base of the community service field by identifying essential program components that lead to valued outcomes and program effectiveness.
