DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification

The following parties have filed petitions to modify the application of mandatory safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Jackson Valley Energy Partners, L.P.

[Docket No. M-98-106-C]

Jackson Valley Energy Partners, L.P., 4655 Coal Mine Road, P.O. Box 1066, Ione, California 95640 has filed a

petition to modify the application of 30 CFR 77.502 (electric equipment; examination, testing, and maintenance) to its Jackson Valley Open Pit Mine (I.D. No. 04-05157) located in Amador County, California. The petitioner requests a variance to operate typical shops where welding and normal maintenance is done without conducting mandatory monthly inspections required for electrical circuits and breakers for maintenance shops. The shops include the normal 120 volt outlets and 480 volt circuit for welders and air compressors. The petitioner states that the electrical circuits in these shops originate in the cogeneration plant which has a complete grounding system and ground fault system that protect from any and all ground fault conditions; and that the lack of monthly inspections would in no way create situations that would compromise the safety of the employees.

2. Clinchfield Coal Company

[Docket No. M-98-107-C]

Clinchfield Coal Company, P.O. Box 7, Dante, Virginia 24237 has filed a petition to modify the application of 30 CFR 75.1710-1(a) (canopies or cabs; self-propelled diesel-powered and electric face equipment; installation requirements) to its McClure No. 2 Mine (I.D. No. 44-04946) located in Dickenson County, Virginia. The petitioner proposes to operate self-propelled electric face equipment without canopies or cabs. The petitioner asserts that application of the standard would result in a diminution of safety to the miners.

3. The Ohio Valley Coal Company

[Docket No. M-98-108-C]

The Ohio Valley Coal Company, 56854 Pleasant Ridge Road, Alledonia, Ohio 43902 has filed a petition to modify the application of 30 CFR 75.364(b)(1) and (b)(4) (weekly examination) to its Powhatan No. 6 Mine (I.D. No. 33-01159) located in Belmont County, Ohio. Due to deteriorating roof and rib conditions in certain areas of the intake air course, traveling the affected area would be unsafe. The petitioner proposes to establish evaluation and monitoring stations instead of examining seals and traveling the entry in its entirety; to maintain the evaluation and monitoring stations in safe travelable condition; to have a certified person take readings for methane, oxygen, and air quantity at the evaluation and monitoring stations for each shift during pre-shift examination, and record the results of the readings on a date board at the evaluation and
