SUPPLEMENTARY INFORMATION:

Title: Evaluation of Asset Accumulation Initiatives.

OMB Number: Not yet assigned.

Expiration Date: Not applicable.

Type of Request: New collection of information.

Abstract: Special-purpose savings accounts are an increasingly common policy tool to encourage personal savings and asset accumulation by low-income individuals. Such savings accounts, established in the name of an individual or family and earmarked for expenditures to promote economic self-sufficiency, are excluded from consideration as countable assets for the purposes of determining eligibility for public benefits. One category of special-purpose accounts, known as Individual Development Accounts (IDAs), are established jointly between the participant and a sponsoring organization that matches the participant's deposits as an additional saving incentive.

A growing number of state and local special-purpose savings programs exist in the United States for low-income savers, with new programs developing rapidly. This growth has been spurred in large part by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, Pub. L. 104-193 (PRWORA). Section 103(a)(1) of that legislation, 42 U.S.C. 604(g), allows states to establish IDA programs using Transitional Assistance to Needy Families (TANF) funds. Other national legislation has been introduced to support special-purpose savings accounts, including the Assets for Independence Act of 1998 (Pub. L. 105-285).

The Food and Nutrition Service (FNS) is conducting a study, Evaluation of Asset Accumulation Initiatives. The purpose of this project is to assess the degree to which state and local programs have been implemented to encourage low-income families (especially food stamp households) to save through special-purpose accounts.

Originally, this study was to involve a series of state demonstrations, as

specified in the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103-66), that were designed to promote the economic self-sufficiency of food stamp recipients through program changes to encourage asset accumulation. These demonstrations were not undertaken, however, as no state submitted an acceptable plan. Through the data collection described here, FNS will address the agency's congressional mandate to study asset accumulation policy.

Data collection will be conducted through the collection of program documents and a single round of telephone interviews in each of 20 states where special-purpose savings initiatives have been implemented. Interviews will be held with three types of respondents in each state: individuals knowledgeable of the specific provisions of the policy, individuals familiar with the administrative operations of the program, and persons who can provide empirical data, if available, about outcomes.

Estimate of Burden: The estimated public reporting burden associated with the telephone interviews is as follows: individuals knowledgeable with specific provisions of the policy (one hour), individuals familiar with the administrative operations of the program (two hours), and systems/evaluation staff (two hours). For each of the latter two categories, the indicated time may include interviews with multiple respondents.

Respondents: The respondents associated with the telephone interviews are listed above.

Estimated Number of Respondents: Telephone interviews will be conducted with a total of up to 100 respondents (up to five respondents from each of 20 states).

Estimated Number of Responses per Respondent: Telephone interviews will be conducted once with each respondent.

Estimated Total Burden on Respondents: The total burden on respondents will be up to 200 hours.

Dated: December 28, 1998.

Agency Approval Number: Not available.

Type of Request: New collection.

Burden: Short form—251,767 hours, Long form—190,400 hours, Reinterview—1,582 hours.

Number of Respondents: 1,400,000.

Avg Hours Per Response: Short form—13 minutes, Long form—48 minutes, Reinterview—6 minutes.

Needs and Uses: The United States Constitution mandates that a census of the Nation's population and housing be taken every 10 years. Title 13 of the United States Code specifies that in addition to the 50 states and the District of Columbia, the census should include Puerto Rico, the U.S. Virgin Islands, American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands. This OMB submission covers Puerto Rico only. The other areas mentioned will be submitted separately. The Census Bureau's goal in Census 2000 is to take the most accurate and cost-effective census possible. The importance of an accurate decennial census cannot be overstated. Puerto Rico census data are used to redraw legislative district boundaries to ensure that political representation is distributed accurately and to determine funding allocations for the distribution of Federal and Puerto Rico funds each year. Census data will tell us what we know about Puerto Rico; they are a definitive benchmark for virtually all demographic information used by the Federal, Puerto Rico and local governments, policy makers, educators, journalists, and community and nonprofit organizations.

Affected Public: Individuals and households.

Frequency: One time.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13, U.S.C., Sections 141, 193, 191.
