

NUCLEAR REGULATORY COMMISSION

[NUREG-1600, Rev. 1]

Revision of NRC Enforcement Policy; Correction**AGENCY:** Nuclear Regulatory Commission.**ACTION:** Policy statement: Modification; Correction.

SUMMARY: This document corrects a notice appearing in the **Federal Register** on January 6, 1999 (64 FR 915), that addresses enforcement discretion in cases involving natural events. This action is necessary to preserve previous revisions to the Enforcement Policy in a notice that appeared in the **Federal Register** on December 24, 1998 (63 FR 71314), that addresses enforcement discretion for fuel cycle facilities.

FOR FURTHER INFORMATION CONTACT: James Lieberman, Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, (301) 415-2741.

SUPPLEMENTARY INFORMATION: On page 916, in the second column, replace the complete paragraph under "C. Exercise of Enforcement Discretion," with the following two paragraphs:

On occasion, circumstances may arise where a licensee's compliance with a Technical Specification (TS) Limiting Condition for Operation or with other license conditions would involve an unnecessary plant transient or performance of testing, inspection, or system realignment that is inappropriate with the specific plant conditions, or unnecessary delays in plant startup without a corresponding health and safety benefit. Similarly, for a gaseous diffusion plant (GDP), circumstances may arise where compliance with a Technical Safety Requirement (TSR) or technical specification or other certificate condition would unnecessarily call for a total plant shutdown or, notwithstanding that a safety, safeguards or security feature was degraded or inoperable, compliance would unnecessarily place the plant in a transient or condition where those features could be required.

In these circumstances, the NRC staff may choose not to enforce the applicable TS, TSR, or other license or certificate condition. This enforcement discretion, designated as a Notice of Enforcement Discretion (NOED), will only be exercised if the NRC staff is clearly satisfied that the action is consistent with protecting the public health and safety. The staff may also grant enforcement discretion in cases

involving severe weather or other natural phenomena, based upon balancing the public health and safety or common defense and security of not operating, against the potential radiological or other hazards associated with continued operation, and a determination that safety will not be impacted unacceptably by exercising this discretion. The Commission is to be informed expeditiously following the granting of an NOED in such situations. A licensee or certificate holder seeking the issuance of a NOED must provide a written justification, or in circumstances where good cause is shown, oral justification followed as soon as possible by written justification, which documents the safety basis for the request and provides whatever other information the NRC staff deems necessary in making a decision on whether to issue a NOED.

Dated at Rockville, MD, this 26th day of January 1999.

For the Nuclear Regulatory Commission.

Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration.
