

proposals are important to recommend to the MBCC is through grants programs that are coordinated through the Council Coordinator's office (NAWWO) within the Service.

Competing for grant funds involves applications from partnerships that describe in substantial detail project locations and other characteristics, to meet the standards established by the Council and the requirements of NAWCA. The Evaluation Grants Pilot Program will differ in the respect that it will be a two-stage process wherein successful applicants will have submitted both a pre-proposal and a proposal. Pre-proposals are intended to allow screening such that only the projects that have the greatest potential for contributing to the evaluation program will be asked to continue into the proposal stage. The Council Coordinator's office currently publishes and distributes Standard and Small Grants instructional booklets that assist the applicants in formulating project proposals for Council consideration. The handbook for this new grants evaluation initiative is an additional information collection document. The instructional booklets and other instruments, e.g., **Federal Register** notices on request for proposals, are the basis for this information collection request for OMB clearance. Information collected under this program is used to respond to such needs as: audits, program planning and management, program evaluation, Government Performance and Results Act reporting, Standard Form 424 (Application For Federal Assistance), grant agreements, budget reports and justifications, public and private requests for information, data provided to other programs for databases on similar programs, Congressional inquiries and reports required by NAWCA, etc. In the case of the additional Evaluation Grants Pilot Program handbook, it responds also to the statutory requirements of the Act.

In summary, information collection under these programs is required to obtain a benefit, i.e., a cash reimbursable grant that is given competitively to some applicants based on eligibility and relative scale of resource values involved in the projects. The information collection is subject to the Paperwork Reduction Act requirements for such activity, which includes soliciting comments from the general public regarding the nature and burden imposed by the collection.

Frequency of Collection: Occasional. We intend the Evaluation Grant Pilot Program to have one project proposal submissions window per year.

Description of Respondents: Households and/or individuals; business and/or other for-profit; not-for-profit institutions; farms; Federal Government; and State, local and/or Tribal governments.

Estimated Completion Time: We estimate the reporting burden, or time involved in writing project submissions, to be 8 hours for a pre-proposal and 40 hours for a proposal.

Number of Respondents: We estimate that 30 pre-proposals and 10 proposals will be submitted each year for the grants evaluation pilot program.

Dated: February 2, 1999.

Jamie Rappaport Clark,

Director, Fish and Wildlife Service.
