

may not be issued to a vessel or to its replacement, or remain valid, if a vessel's permit or fishing history has been used to qualify another vessel for another Federal fishery.

(iv) *Consolidation restriction.* Limited access permits may not be combined or consolidated.

(v) *Confirmation of permit history.* Notwithstanding any other provisions of this part, a person who does not currently own a fishing vessel, but who has owned a qualifying vessel that has sunk, been destroyed, or transferred to another person, must apply for and receive a CPH if the fishing and permit history of such vessel has been retained lawfully by the applicant. To be eligible to obtain a CPH, the applicant must show that the qualifying vessel meets the eligibility requirements, as applicable, in this part. Issuance of a valid CPH preserves the eligibility of the applicant to apply for a limited access permit for a replacement vessel based on the qualifying vessel's fishing and permit history at a subsequent time, subject to the replacement provisions specified in this section. A CPH must be applied for in order for the applicant to preserve the fishing rights and limited access eligibility of the qualifying vessel. If fishing privileges have been assigned or allocated previously under this part, based on the qualifying vessel's fishing and permit history, the CPH also preserves such fishing privileges. Any decision regarding the issuance of a CPH for a qualifying vessel that has applied for or been issued previously a limited access permit is a final agency action subject to judicial review under 5 U.S.C. 704. An application for a CPH must be received by the Regional Administrator no later than 30 days prior to the end of the first full fishing year in which a vessel permit cannot be issued. Failure to do so is considered abandonment of the permit as described in paragraph (q) of this section. A CPH issued under this part will remain valid until the fishing and permit history preserved by the CPH is used to qualify a replacement vessel for a limited access permit. Information requirements for the CPH application are the same as those for a limited access permit with any request for information about the vessel being applicable to the qualifying vessel that

has been sunk, destroyed, or transferred. Vessel permit applicants who have been issued a CPH and who wish to obtain a vessel permit for a replacement vessel based upon the previous vessel history may do so pursuant to paragraph (b)(1)(i)(D) of this section.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 981222313-8320-02; I.D. 021299B]

Fisheries of the Exclusive Economic Zone Off Alaska; Groundfish by Vessels Using Non-pelagic Trawl Gear in the Red King Crab Savings Subarea

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is closing directed fishing for groundfish with non-pelagic trawl gear in the red king crab savings subarea (RKCSS) of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the amount of the interim 1999 red king crab bycatch limit specified for the RKCSS.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), February 14, 1999, until superseded by the Final 1999 Harvest Specification for Groundfish, which will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Andrew Smoker, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI exclusive economic zone according to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP

appear at subpart H of 50 CFR part 600 and CFR part 679.

The Interim 1999 Harvest Specifications of Groundfish (64 FR 50, January 4, 1999) established the amount of the interim 1999 red king crab bycatch limit specified for the RKCSS as 10,000 animals. The RKCSS was closed to fishing with non-pelagic trawl gear on January 25, 1999 (64 FR 4602, January 29, 1999) and then re-opened on February 1, 1999 (64 FR 5720, February 5, 1999) when it was determined that the bycatch limit was not fully utilized.

In accordance with § 679.21(e)(7)(ii)(B), the Administrator, Alaska Region, NMFS, has determined that the amount of the interim 1999 red king crab bycatch limit specified for the RKCSS will be caught. NMFS is closing the RKCSS to directed fishing for groundfish with non-pelagic trawl gear.

Maximum retainable bycatch amounts may be found in the regulations at § 679.20(e) and (f).

Classification

This action responds to the best available information recently obtained from the fishery. It must be implemented immediately to prevent exceeding the amount of the interim 1999 red king crab bycatch limit specified for the RKCSS. Providing prior notice and an opportunity for public comment on this action is impracticable and contrary to the public interest. The fleet will soon take the amount. Further delay would only result in the amount of the interim 1999 red king crab bycatch limit specified for the RKCSS being exceeded. NMFS finds for good cause that the implementation of this action cannot be delayed for 30 days. Accordingly, under U.S.C 553(d), a delay in the effective date is hereby waived.

This action is required by § 679.21 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 12, 1999.

Gary C. Matlock,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
