**FOR FURTHER INFORMATION CONTACT:** Mr. Richard Raines, telephone: (303) 445-2237; or Ms. Lynnette Wirth, Bureau of Reclamation, Mid-Pacific Region, Public Affairs Office, Attention: MP-140, 2800 Cottage Way, Sacramento CA; telephone: (916) 978-5102. Additional information regarding the new TFF can be obtained from the Mid-Pacific Regional Office "Grapevine" at 1-800-742-9474.

**SUPPLEMENTARY INFORMATION:** The Tracy Fish Facility Improvement Program has been identifying and making physical improvements and operational changes, assessing fishery conditions, and monitoring fish salvage operations per numerous agency agreements. On October 30, 1992, Pub. L. 102-575, the Reclamation Projects Authorization and Adjustment Act of 1992, was enacted. Title 34, the Central Valley Project Improvement Act, Section 3406(b)(4), states in part that the Secretary of the Interior will "develop and implement a program to mitigate for fishery impacts associated with operations of the Tracy Pumping Plant. Such a program shall include, but not be limited to, improvement or replacement of the fish screens and fish recovery facilities and practices associated with the Tracy Pumping Plant."

To significantly improve the Tracy Fish Collection Facility, new

approaches and development and experimentation of new technologies will be required. Importantly, improvements must be made while not threatening the existing contracted water deliveries through the Tracy Pumping Plant. Presently, the Tracy Fish Facility Improvement Program is constrained by these daily water deliveries which prevent significant modification of the facilities. Because of this, Reclamation proposes to develop the new TFF to be located adjacent to the existing Tracy Fish Collection Facility. Several conceptual alternatives are being investigated. The new TFF will be designed initially for testing and demonstrating new technology. Successful components will ultimately be used to replace the present Tracy Fish Collection Facility, and this action will require additional environmental documentation.

The new TFF will also provide timely information on critical issues related to new fish protection facilities for the State of California's diversion at Clifton Court Forebay (CCF), and/or for a diversion in the North Delta being considered as a part of the CALFED Bay-Delta Program. The CALFED Bay-Delta Program (a cooperative effort among State and Federal agencies and California's environmental, urban, and agricultural communities) is supportive of efforts to develop new fish screen and salvage technology that can be applied at Tracy and other locations. Currently, Reclamation is working with the CALFED Bay-Delta Program agencies to develop a Project Management Agreement for the preferred design approach, facility specifications, and process for incorporating input from participating agencies. The new TFF is presently supported by a professional team of fishery scientists, engineers, and management staff now working with the Tracy Fish Facility Improvement Program.
