NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a

proposed revision of a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, DG-1084 (which should be mentioned in all correspondence concerning this draft guide), is the Second Proposed Revision 3 of Regulatory Guide 1.8, "Qualification and Training of Personnel for Nuclear Power Plants." The guide will be in Division 1, "Power Reactors." This proposed revision is being developed to provide current guidance acceptable to the NRC staff regarding qualifications and training for nuclear power plant personnel. This regulatory guide would endorse an American Nuclear Society standard, ANSI/ANS-3.1-1993, "Selection, Qualification, and Training of Personnel for Nuclear Power Plants," with certain clarifications, additions, and exceptions.

The draft guide has not received complete staff approval and does not represent an official NRC staff position.
