

Standards for Grain Elevators. This information notifies EPA when a source becomes subject to the regulations, informs the Agency if a source is in compliance.

In the Administrator's judgment, particulate matter emissions from grain elevators cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Therefore, NSPS were promulgated for this source category, as required under Section 111 of the Clean Air Act.

Particulate emissions from grain elevators are the result of grain drying and grain handling operations, including loading and unloading. These standards rely on the proper operation of particulate control devices such as baghouses and equipment such as shed doors and spouts designed to reduce particulate emission during grain unloading and loading.

Owners or operators of the affected facilities subject to NSPS Subpart DD must make the following one-time-only reports: notification of the date of construction or reconstruction; notification of the anticipated and actual dates of startup; notification of any physical or operational change to an existing facility that may increase the rate of emission of the regulated pollutant; notification of the date of the initial performance test; and the results of the initial performance test, including information necessary to determine the conditions of the performance test and performance test measurements and results, including particulate matter concentration and opacity.

Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, as well as the nature and cause of the malfunction (if known) and corrective measures taken. These notifications, reports and records are required, in general, of all sources subject to NSPS. Without such information, enforcement personnel would be unable to determine if the standards are being met.

Approximately 118 sources are currently subject to the standard. EPA estimates that three additional sources will become subject to the standard in each of the next three years.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d),

soliciting comments on this collection of information was published on June 4, 1999 (64 FR 30011); no comments were received.

The required information consists of emissions data and other information that have been determined not to be private. However, any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, Chapter 1, Part 2, Subpart B—Confidentiality of Business Information (see 40 CFR 2; 41 FR 36902, September 1, 1976; amended by 43 FR 40000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 1764, March 23, 1979).

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2.1 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Entities potentially affected by this action are each truck unloading station, truck loading station, barge and ship unloading station, barge and ship loading station, railcar loading station, railcar unloading station, grain dryer, and all grain handling operations at any grain terminal elevator or any grain storage elevator subject to NSPS Subpart DD.

**Estimated Number of Respondents:** 121.

**Frequency of Response:** Initial.

**Estimated Total Annual Hour Burden:** 250.

**Estimated Total Annualized Capital, O&M Cost Burden:** \$0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No 1130.06 and

OMB Control No.2060-0082 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Office of Policy, Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460;

and

### Agency Information Collection Activities: Submission for OMB Review; Comment Request, New Source Performance Standards for Petroleum Dry Cleaners

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: New Source Performance Standard (NSPS) for Petroleum Dry Cleaners Subpart JJJ, OMB Control Number 2060-0079 expiring November 30, 1999. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before October 27, 1999.

**FOR FURTHER INFORMATION CONTACT:** Sandy Farmer at EPA by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download a copy of the ICR off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 0997.06.

**SUPPLEMENTARY INFORMATION:** *Title:* New Source Performance Standard (NSPS) for Petroleum Dry Cleaners Subpart JJJ, OMB Control No. 2060-0079; EPA ICR No.0997.06) expiring 11/30/99. This is a request for extension of a currently approved collection.

*Abstract:* The New Source Performance Standards (NSPS) for the

Petroleum Dry Cleaning industry (Subpart JJJ) were proposed on December 14, 1982 and promulgated on September 21, 1984. These standards apply to the owners or operators of petroleum dry cleaning facilities constructed, reconstructed, or modified after December 14, 1982 whose total manufacturer's rated dryer capacity is equal to or greater than 38 kilograms (84 pounds). Owners or operators of the affected facilities described must make one-time-only notifications. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Monitoring requirements and recordkeeping requirements specific to Subpart JJJ are related to the initial performance test. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NSPS. Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least 2 years following the date of such records. This information is being collected to assure compliance with 40 CFR part 60 subpart JJJ. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 6/4/99 (64 FR 107); no comments were received.

*Burden Statement:* The annual public reporting and recordkeeping burden for this collection of information is estimated to average 20 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of

information; and transmit or otherwise disclose the information.

*Respondents/Affected Entities:* Owners/Operators of Petroleum Dry Cleaners.

*Estimated Number of Respondents:* 18.

*Frequency of Response:* Initial.

*Estimated Total Annual Hour Burden:* 1,483 hours.

*Estimated Total Annualized Capital, O&M Cost Burden:* \$ 0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No 0997.06 and OMB Control No. 2060-0079 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Office of Policy, Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460; and

### Agency Information Collection Activities: Submission for OMB Review; Comment Request, New Source Performance Standards (NSPS) Synthetic Fiber Production Facilities

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: New Source Performance Standards (NSPS) Subpart HHH Synthetic Fiber Production Facilities; OMB Control Number 2060-0059; expiration 10/31/99. The ICR describes the nature of the information collection

and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before October 27, 1999.

**FOR FURTHER INFORMATION CONTACT:** Sandy Farmer at EPA by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download a copy of the ICR off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 1156.08.

### SUPPLEMENTARY INFORMATION:

*Title:* NSPS Subpart HHH Synthetic Fiber Production Facilities; OMB Control Number 2060-0059; EPA ICR No. 1156.08; expiration 10/31/99. This is a request for extension of a currently approved collection.

*Abstract:* The New Source Performance Standards (NSPS) for synthetic fiber production facilities (Subpart HHH) were proposed on November 23, 1982 and promulgated on April 5, 1984. These standards apply to each solvent-spun synthetic fiber process that produces more than 500 megagrams of fiber per year and that commenced construction or reconstruction after November 23, 1982. The provisions of this subpart do not apply to any facility that uses the reaction spinning process to produce spandex fiber or the viscose process to produce rayon fiber, nor to facilities that commence modification but not reconstruction after November 23, 1982. VOCs are the pollutants regulated under this Subpart.

Owners or operators of the affected facilities described must make one-time-only initial notifications and report on the results of the initial performance test. Owners or operators also are required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Monitoring requirements specific to synthetic fiber production facilities provide information on VOC emissions. Owners or operators of affected facilities are required to install, calibrate, maintain, and operate a continuous monitoring system for the measurement of makeup solvent and solvent feed. These values shall be used in calculating monthly VOC emissions. Section 60.603(b)(1) provides three options for determining solvent feed.

Each owner or operator calculates VOC emissions every month from the amount of solvent feed and makeup solvent used in each affected facility. These values are used to calculate compliance with the emission
