[Docket No. NHTSA-99-6268; Notice 1]

AmTran Corporation; Receipt of Application for Decision of Inconsequential Noncompliance

AmTran Corporation (AmTran), of Conway, Arkansas, has determined that some AmTran model RE (rear engine) school buses do not meet the emergency exits requirements for the rear push out windows specified in Federal Motor Vehicle Safety Standard (FMVSS) No. 217, "Bus Emergency Exits and Window Retention and Release" and has filed an appropriate report pursuant to 49 CFR Part 573, "Defects and Noncompliance Reports." AmTran has also applied to be exempted from the notification and remedy requirements of 49 U.S.C. Chapter 301 "Motor Vehicle Safety" on the basis that the noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of an application is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgement concerning the merits of the application.

FMVSS No. 217, S5.2.3.4(b) requires that school buses that are equipped with a left side emergency exit door instead of a rear emergency exit door also be equipped with a rear push-out window that provide a minimum opening clearance 41 centimeters high and 122 centimeters wide.

AmTran has notified the National Highway Traffic Safety Administration that it had manufactured approximately 1,100 model RE school buses between January 1, 1998 and April 21, 1999 that do not provide for the minimum clearance requirements for the rear push-out emergency exit windows.

AmTran stated the following:
