

index price regarding the actual cost of gas during a production month.

CIG further states that an average daily index price is superior to a first of the month index in deterring gaming by shippers, such as when a shipper decides to deliberately (1) Incur or not clear imbalances, (2) Not return loaned quantities to park-loan service, or (3) Not return excess deliveries in its swing service account. CIG states a first of the month index invites gaming because this type of index price allows a shipper to readily determine when there is an economic advantage to engage in gaming.

CIG states that copies of the filing have been mailed to all affected customers and state regulatory commissions.
