**SUPPLEMENTARY INFORMATION:** This notice announces BPA's intention to prepare an EIS on the construction, operation, and maintenance of a 10-mile-long 500-kv transmission line. This action may involve floodplain and wetlands located in King County, State of Washington. The action is necessary to maintain reliable load service during severe winter conditions in the growing northwest Washington area. The intended effect on the public is to maintain a reliable high-voltage transmission system and to avoid significant load loss in the south Seattle area. When completed, the Draft EIS will be circulated for review and comment, and BPA will hold a public comment meeting for the Draft EIS. BPA will consider and respond to comments received on the Draft EIS in the Final EIS during which affected landowners, concerned citizens, special interest groups, local governments, and any other interested parties are invited to comment on the scope of the proposed EIS. Scoping will help BPA ensure that a full range of issues related to this proposal is addressed in the EIS, and also will identify significant or potentially significant impacts that may result from the proposed project.

BPA proposes to construct a 500-kv transmission line near the community of Kangley in King County, Washington, in 2002. BPA has identified three action alternatives for constructing the transmission line, all of which cross the Cedar River Municipal Watershed. The Cedar River Municipal Watershed is a large natural area in the Cascade Mountains that is used by the City of Seattle to collect approximately two thirds of the potable water for about 1.3 million people in King and Snohomish Counties.

Maps and further information are available from BPA at the address above.

Issued in Portland, Oregon, on March 17, 2000.
