National Highway Traffic Safety Administration

49 CFR Part 572

[Docket No. NHTSA-00-7052]

RIN 2127-AG78

Anthropomorphic Test Devices; 12-Month-Old Child Dummy

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Final rule.

SUMMARY: This document adopts design and performance specifications for a new 12-month-old infant dummy. The new dummy is especially needed to evaluate the effects of air bag deployment on children who are in rear-facing child restraints installed in the front passenger seat of vehicles. It will also provide greater and more useful information in a variety of crash environments to evaluate child safety. Adopting the dummy is a step toward using it in the tests we conduct to determine compliance with our safety standards. The use of the dummy in our compliance tests is being addressed in separate rulemaking proceedings.

DATES: The amendment is effective on May 30, 2000. The incorporation by reference of certain publications listed

in the regulations is approved by the Director of the Federal Register as of May 30, 2000.

Petitions for reconsideration of the final rule must be received by May 15, 2000.

ADDRESSES: Petitions for reconsideration should refer to the docket number and notice number of the notice and be submitted to: Administrator, room 5220, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: For nonlegal issues: Stan Backaitis, Office of Crashworthiness Standards (telephone: 202-366-4912). For legal issues: Deirdre R. Fujita, Office of the Chief Counsel (202-366-2992). Both can be reached at the National Highway Traffic Safety Administration, 400 Seventh St., S.W., Washington, D.C., 20590.

SUPPLEMENTARY INFORMATION: This document amends our regulation for Anthropomorphic Test Devices (49 CFR Part 572) by adding Subpart R, containing specifications for a new, more advanced 12-month-old infant test dummy. The new dummy is more representative of humans than the dummies representing younger infants in Part 572, and allows the assessment of the potential for more types of injuries in automotive crashes. The new dummy can be used to evaluate the effects of air bag deployment on children in rear-facing child restraints and potentially on out-of-position children, and can provide a fuller evaluation of the performance of child restraint systems in protecting young children.

NHTSA has already specified a number of child test dummies in Part 572, including dummies representing a newborn, a 6-month-old and a 9-month-old child (subparts K, D and J, respectively). The dummies have been used to test child restraint systems to the requirements of Federal Motor Vehicle Safety Standard No. 213 (49 CFR 571.213). These test devices enable NHTSA to evaluate motor vehicle safety systems dynamically, in a manner that is both measurable and repeatable.

Today's final rule is part of NHTSA's effort to add to and improve the child dummies specified in Part 572. We recently amended Part 572 to add new, more advanced, Hybrid III-type test dummies representing a 6-year-old and a 3-year-old child. Together with the dummy adopted today, the new child test dummies will be used in tests we are specifying in our occupant crash protection standard (49 CFR 571.208) to assess the risks of air bag deployment for children, particularly unrestrained,
