

to diflubenzuron-derived PCA is 1.31×10^{-8} . This risk is below EPA's level of concern.

2. *Infants and children.* The same assumptions as for the U.S. population were used for the dietary exposure risk determination in infants and children. The dietary exposure of diflubenzuron was calculated as 0.000003 mg/kg/day and 0.000007 mg/kg/day respectively for nursing and non-nursing infants. These values are 0.2% and 0.4%, respectively of the RfD for diflubenzuron. The dietary exposure from diflubenzuron in children 1–6 and 7–12 years old was determined as 0.000015 mg/kg/day and 0.000011 mg/kg/day, respectively. These values are <0.1% of the RfD.

As previously discussed, the NOAELs for maternal and developmental toxicity in rats and rabbits were greater than 1,000 mg/kg/day, and the NOAEL for reproductive toxicity was greater than 5,000 mg/kg/day. Therefore, based on the completeness and reliability of the toxicity data and the conservative exposure assessment, Uniroyal concludes that there is reasonable certainty that no harm will result in infants and children from aggregate exposure to residues of diflubenzuron and its conversion products containing the p-chloroaniline moiety.

F. International Tolerances

There is no Codex Alimentarius Commission Maximum Residue Level for Residues of diflubenzuron on range grass.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–0400.

Title: Tariff Review Plan.

Form No.: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 45.

Estimated Time Per Response: 61 hours.

Frequency of Response: On occasion reporting, biennial and annual requirements.

Total Annual Burden: 2,745.

Total Annual Cost: N/A.

Needs and Uses: Local telephone companies are required to update their rates annually or biennially to reflect Federal Communications Commission (FCC) requirements. To reduce the regulatory burden on reporting Local Exchange Carriers (LECs) as well as reviewers, the Commission developed tariff review plans (TRPs). The TRPs set for the summary material that LECs must file to support revisions to the rates in their interstate access service rates. The TRPs display basic data on rate development in a consistent manner, thereby facilitating review of the LEC rate revisions by the Commission and interested parties.

As of August 1999, there were 151 tariff filing entities. Of these, there were

16 Class A LECs with regulated state and interstate telecommunications revenues of \$100 million or more. These LECs file pursuant to price cap regulations under 47 CFR 61.43 of the Commission's rules. There were 29 LECs filing pursuant to rate of return regulation under 47 CFR 61.38 of the Commission's rules. One hundred and six (106) LECs with revenues less than \$50 million file pursuant to 47 CFR 61.39 of the Commission's rules and are not required to submit a TRP. Thus, the number of filing entities is 45.

As stated above, the largest LECs, those with regulated state and interstate telecommunications revenue of \$100 million or greater per year (Class A LECs), file pursuant to price cap regulation under § 61.43. This regulation was implemented in 1990 and has dramatically reduced the reporting burden of these companies, from a TRP of 173 pages to a TRP of 36 pages. The 29 LECs that file pursuant to § 61.38 file a TRP of 29 pages, which also represents a reduction in reporting burden compared to earlier years.

The TRP material is used by FCC staff to determine whether the access charges are just and reasonable as required by the Communications Act. If the information were not filed, the FCC would not be able to carry out its responsibility as required by the Act.

Description: Bell Operating Companies (BOCs) that petition for LATA boundary modifications to encourage the deployment of advanced services on a reasonable and timely basis are requested to include information in accordance with the criteria specified in CC Docket 98-147, Fourth Report and Order and Memorandum Opinion and Order, released February 11, 2000.

A BOC must include the following criteria to the extent applicable in any request for LATA boundary modification to supply advance

services: (i) The customer and type of customer to be serviced; (ii) the specific service or services currently provided, or to be provided, to that customer; (iii) the capacity required to provide the service; (iv) the protocols to be used to provide the service; (v) the physical mode of transport; (vi) the path that the network would take if the LATA modification were to be granted, with a map of the proposed modification indicating the location of the nearest NAP; (vii) efforts made to obtain interLATA access from an interexchange carrier (IXC), or other provider of interLATA services; and (viii) any response, or offer to supply advanced service, received from another provider of interLATA transport. The BOC should describe the quality of the service offered by available interLATA providers; the affordability of the service; and include any other information that may be needed on a case by case basis. See CC Docket No. 98-147 for complete details on criteria. The Commission will use this information to review the petitions.

In order to review request for LATA modifications promptly and efficiently, it is necessary that BOCs provide the information specified in the Order. The criteria set forth in the Order will serve to ease the petition process on BOCs by providing guidelines that will serve to narrow the scope of their petitions to the issues and facts that the Commission is primarily concerned with. In addition, the request will also expedite the petition review process by ensuring that petitioners will provide all of the information the Commission needs to properly review the requests. Obligation to respond: Required to obtain or retain benefits.
