For the years in which Exxon uses F037 lime sludge to adjust the pH of the ZOI soils at the SLTU, Exxon must submit to EPA the following information in the annual report: pH of the F037 lime sludge applied to the SLTU, and the other measurements and tests used to determine the need for pH adjustment as well as the quantity of F037 lime sludge applied and the quantity of any other substance (e.g., lime) used to adjust the pH of the ZOI soil at the SLTU.

#### 6. Waste Tracking

As part of its waste tracking process, Exxon must confirm receipt of analytical results for any wastes for which the hazardous status is not currently known prior to application of the waste at the SLTU. Exxon must comply with its Montana hazardous waste permit conditions with regard to restrictions on the application of waste to the SLTU, such as any restrictions based on the pH of the waste.

#### 7. Information Requests

Upon request by EPA, Exxon shall provide to the EPA within a reasonable time, any relevant information requested to determine compliance with the conditions of this variance.

#### 8. Access

Exxon shall allow EPA, or authorized representatives, upon the presentation of credentials and other documents as may be required by law to: (a) inspect at reasonable times any records, facilities, equipment (including monitoring and control equipment), practices, or operations related to the disposal of restricted hazardous wastes at the SLTU; and (b) sample or monitor at reasonable times, for the purposes of assuring compliance with the conditions of this variance or to determine migration or as otherwise authorized by RCRA, any wastes intended or proposed for disposal at the SLTU and the soil, air, soil-pore liquids or ground water in or surrounding the SLTU.
