

contains a certified detergent at its LAC is delivered to the consumer. The EPA maintains a list of certified gasoline detergents, which is publicly available. As of March 2000 there were approximately 225 certified detergents and 16 detergent manufacturers.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed at 40 CFR Part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: EPA estimates that the average burden for detergent certification is 60 hours and \$3869, and that there will be approximately 50 applications for detergent certification each year for the next three years. Thus, the annual burden is estimated at 3000 hours and \$193,450.

Most of the burden is incurred by the blenders of detergent into gasoline or PRC. The regulations require that they generate and maintain records of the amount of detergent blended and the amount of gasoline into which it is blended. These records are known as volumetric additive reconciliation (VAR) records and must demonstrate that the proper amount of a certified detergent has been used. For blenders with automated equipment, the annual burden is estimated at 150 hours and \$8,373. There are approximately 1300 blenders which use automated equipment. Thus the annual burden is 195,000 hours and \$10.9 million. For blenders with non-automated equipment, the annual burden is estimated at 500 hours and \$27,910. It is estimated that there are 50 blenders in this category, for an annual burden of 25,000 hours and \$1,395,500.

The other requirements are customary business practices, and thus do not incur additional burden. For example, the regulations require the generation, transfer, and storage of product transfer documents (PTDs) indicating the detergent status of a shipment of gasoline. PTDs containing a variety of information about the gasoline shipment are a standard business practice. Research, racing, and aviation gasolines are exempt.

There are no capital or start-up costs beyond those incurred by industry at the program's inception in 1995. There are no operating and maintenance costs beyond copying and postage. The total annual estimated burden for industry is 223,000 hours and \$12.5 million. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: May 3, 2000.

Merrylin Zaw-Mon,

Director, Transportation and Regional Programs Division.

Chlorpyrifos, Revised Pesticide Risk Assessment; Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA will hold a public meeting to present the revised risk assessments for one organophosphate pesticide, chlorpyrifos, to interested stakeholders. This public meeting, called a "Technical Briefing," will provide an opportunity for stakeholders to learn about the data, information, and methodologies that the Agency used in revising its risk assessments for

chlorpyrifos. In addition, representatives of the Department of Agriculture (USDA) will also provide ideas on possible risk management for chlorpyrifos.

DATES: The technical briefing will be held on Thursday, June 8, 2000, from 1 p.m. to 4 p.m.

ADDRESSES: The technical briefing will be held at the Holiday Inn Capitol at the Smithsonian, 550 C St., SW., Washington, DC 20024, (202) 479-4000.

FOR FURTHER INFORMATION CONTACT: By mail: Karen Angulo, Special Review and Registration Division (7508C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 308-8004; e-mail address: angulo.karen@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action applies to the public in general. As such, the Agency has not attempted to specifically describe all the entities potentially affected by this action. The Agency believes that a wide range of stakeholders will be interested in technical briefings on organophosphate pesticides, including environmental, human health, and agricultural advocates, the chemical industry, pesticide users, and members of the public interested in the use of pesticides on food. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at <http://www.epa.gov/>. To access this document, on the Home Page select "Laws and Regulations" and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at <http://www.epa.gov/fedrgstr/>.

To access information about organophosphate pesticides, you can also go directly to the Home Page for the Office of Pesticide Programs (OPP) at <http://www.epa.gov/pesticides/op/>.

2. *In person.* The Agency has established an official record under docket control number OPP-34203B.

The official record consists of the documents specifically referenced in this action, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305-5805.

II. What Action is the Agency Taking?

This document announces the Agency's intention to hold a technical briefing for the organophosphate pesticide, chlorpyrifos. The Agency is presenting the revised risk assessments for chlorpyrifos to interested stakeholders. This technical briefing is designed to provide stakeholders with an opportunity to become even more informed about an organophosphate's risk assessment. EPA will describe in detail the revised risk assessments: Including the major points (e.g., contributors to risk estimates); how public comment on the preliminary risk assessment affected the revised risk assessment; and the pesticide use information/data that was used in developing the revised risk assessment. Stakeholders will have an opportunity to ask clarifying questions. In addition, representatives of the USDA will provide ideas on possible risk management.

The technical briefing is part of the pilot public participation process that EPA and USDA are now using for involving the public in the reassessment of pesticide tolerances under the Food Quality Protection Act (FQPA), and the reregistration of individual organophosphate pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The pilot public participation process was developed as part of the EPA-USDA Tolerance Reassessment Advisory Committee (TRAC), which was established in April 1998 as a subcommittee under the auspices of EPA's National Advisory Council for Environmental Policy and Technology. A goal of the pilot public participation

process is to find a more effective way for the public to participate at critical junctures in the Agency's development of organophosphate pesticide risk assessment and risk management decisions. EPA and USDA began implementing this pilot process in August 1998 in response to Vice President Gore's directive to increase transparency and opportunities for stakeholder consultation.

The Agency will issue a **Federal Register** notice to provide an opportunity for public viewing of the chlorpyrifos revised risk assessments and related documents in the Public Information and Records Integrity Branch and on the OPP Internet web site that are described in Unit I.B.1, and to provide an opportunity for a 60-day public participation period during which the public may submit risk management and mitigation ideas, and recommendations and proposals for transition.

List of Subjects

Environmental protection, Chemicals, Pesticides and pests.

Dated: May 8, 2000.

Lois A. Rossi,

Director, Special Review and Reregistration Division, Office of Pesticide Programs.

Chlorfenapyr; Withdrawal of an Application To Register a Pesticide Product Containing a New Active Ingredient

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: American Cyanamid Company has withdrawn its application to register chlorfenapyr (4-bromo-2-(4-chlorophenyl)-1-(ethoxymethyl)-5-(trifluoromethyl)-1H-pyrrole-3-carbonitrile) pesticide products for use on cotton (EPA File Symbols 241-GAT and 241-GAI).

FOR FURTHER INFORMATION CONTACT: Ann Sibold, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, Ariel Rios Bldg., 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: 703-305-6502; fax number: 703-305-6596; e-mail address: sibold.ann@epa.gov.

SUPPLEMENTARY INFORMATION:

A. Does This Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Cat-egories	NAICS codes	Examples of poten-tially affected entities
Industry	111 112 311 32532	Crop production Animal production Food manufacturing Pesticide manufac-turing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of This Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at <http://www.epa.gov/>.
