

V. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Offer alternative ways to improve the proposed rule or collection activity.
7. Make sure to submit your comments by the deadline in this document.
8. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

VI. What is the Agency's Authority for Taking this Action?

Section 5(h)(1) of TSCA and 40 CFR 720.38 authorize EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes, if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present an unreasonable risk of injury.

VII. What Action is the Agency Taking?

EPA has approved the above-referenced TME. EPA has determined that test marketing the new chemical substance, under the conditions set out in the TME application and in this notice, will not present any unreasonable risk of injury to health or the environment.

VIII. What Restrictions Apply to this TME?

All conditions and restrictions described in the TME application and in this notice must be met. The test market time period, production volume, number of customers, and use must not

exceed specifications in the application and this notice. A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME. Further restrictions are described in sections IX and X below.

TME-00-4.

Date of Receipt: May 3, 2000. The extended comment period will close July 5, 2000.

Applicant: Westvaco Corporation
Chemical: Fatty acids, tall-oil, reaction products with castor oil and substituted amines, chloride salt

Use: asphalt emulsifier.
Production Volume: CBI
Number of Customers: 1
Test Marketing Period: 12 months, commencing on first day of commercial manufacture.

IX. What Personal Protective Equipment is Required for this Chemical?

During manufacturing, processing, and use of the substance at any site controlled by the applicant, any person under the control of the applicant, including employees and contractors, who may be dermally exposed to the substance shall use:

- a. Gloves determined by the applicant to be impervious to the substance under the substance under the conditions of exposure, including the duration of exposure. The applicant shall make this determination either by testing the gloves under the conditions of exposure or by evaluating the specifications provided by the manufacturer of the gloves. Testing or evaluation of specifications shall include consideration of permeability, penetration, and potential chemical and mechanical degradation by the PMN substance and associated chemical substances;
- b. Clothing which covers any other exposed areas of the arms, legs, and torso; and
- c. Chemical safety goggles or equivalent eye protection.

X. What Records must be kept for this TME?

The applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. Records of the quantity of the TME substance produced and the date of manufacture.
2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.

3. Copies of the bill of lading that accompanies each shipment of the TME substance.

4. Records documenting compliance with the personal protective equipment requirements, including copies of any determination that the protective gloves used by the applicant are impervious to the substance.

XI. What was EPA's Risk Assessment for this TME?

EPA identified no significant environmental concerns for the test market substance; however, human health concerns were raised for the substance. Specifically, Agency reviewers identified potential concerns for severe irritation or corrosion to the skin and eye. These concerns were mitigated due to the required use of appropriate personal protective equipment. Therefore, the test market activities will not present any unreasonable risk of injury to human health or the environment.

XII. Can EPA Change Its Decision on this TME in the Future?

Yes. The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information that comes to its attention cast significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to human health or the environment.
