

**DEPARTMENT OF LABOR****Mine Safety and Health Administration****30 CFR Part 72**

RIN 1219-AB18

**Determination of Concentration of Respirable Coal Mine Dust; Correction**

**AGENCY:** Mine Safety and Health Administration (MSHA), Labor.

**ACTION:** Proposed rule; correction.

**SUMMARY:** This document corrects typographical errors which appeared in the preamble to the joint proposed rule that announced that the Secretary of Labor and the Secretary of Health and Human Services (the Secretaries) would find in accordance with sections 101 (30 U.S.C. 811) and 202(f)(2) (30 U.S.C. 842(f)(2)) of the Federal Mine Safety and Health Act of 1977 that the average concentration of respirable dust to which each miner in the active workings of a coal mine is exposed can be accurately measured over a single shift. No corrections are being made to the regulatory text.

The joint proposal published in the **Federal Register** on July 7, 2000, would rescind a previous 1972 finding by the Secretaries on the validity of such single-shift sampling.

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA proposes to approve the State Implementation Plan (SIP) revision submitted by the State of Maryland for the purpose of establishing operational flexibility to meet visible emission limits for batch type hot-dip galvanizing installations. In the Final Rules section of this **Federal Register**, EPA is approving the State's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A more detailed description of the state submittal and EPA's evaluation are included in a Technical Support Document (TSD) prepared in support of this rulemaking action. A copy of the TSD is available, upon request, from the EPA Regional Office

listed in the **ADDRESSES** section of this document. If no adverse comments are received in response to this action, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time.

**DATES:** Comments must be received in writing by August 24, 2000.

**ADDRESSES:** Written comments should be addressed to Ms. Makeba A. ### Radio Broadcasting Services; Babb, MT

**AGENCY:** Federal Communications Commission.

**ACTION:** Proposed rule; denial.

**SUMMARY:** This document denies a petition for rule making filed by the Battani Corporation requesting the allotment of Channel 233C3 at Babb, Montana. See 64 FR 24997, May 10, 1999. Based on the information submitted by Battani Corporation, we believe it has failed to establish that Babb qualifies as a community for allotment purposes and therefore it would not serve the public interest to allot a channel to Babb.
