These include measures to: define the management units; address dealer, vessel, and operator permits; consider data reporting requirements; identify estimates of maximum sustainable yield, optimum yield, and overfishing/overfished criteria; and, framework options to enable seasonal adjustments to the management structure. Other actions, with options, are separately applicable to each council's area of jurisdiction, and include actions that may be implemented through the framework procedures, e.g. minimum size limits, bag limits, trip limits, and allocations, among others.

The draft amendment proposes to put a moratorium on the issuance of additional permits for charter vessels to fish for reef fish or coastal migratory pelagics in Federal waters of the Gulf of Mexico. The amendment will make the charter vessel permits transferable.
