You do not need intervenor status to have your comments considered.

All intervenors, agencies, elected officials, local governments, special interest groups, libraries, media, and anyone providing written comments on the DEIS will receive a copy of the FEIS. If you do not wish to comment on the DEIS but wish to receive a copy of the

FEIS, you must write to the Secretary of the Commission indicating this request.

The DEIS has been placed in the public files of the FERC and is available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference and Files Maintenance Branch, 888 First Street, NE., Room 2A, Washington, DC 20426, (202) 208-1371.

[Docket No. CP00-6-000]

Gulfstream Natural Gas System, L.L.C.; Notice of Availability of the Draft Environmental Impact Statement for the Proposed Gulfstream Pipeline Project

August 30, 2000.

The staff of the Federal Energy Regulatory Commission (FERC of Commission) has prepared a draft environmental impact statement (DEIS) on natural gas pipeline facilities proposed by Gulfstream Natural Gas System, L.L.C. (Gulfstream) in the above-referenced docket. The application and other supplemental filings in this docket are available for viewing on the FERC Internet website (www.ferc.fed.us). Click on the "RIMS" link, select "Docket #" from the RIMS menu, and following the instructions.

The DEIS was prepared to satisfy the requirements of the National Environmental Policy Act (NEPA). The staff concludes that approval of the Gulfstream Pipeline Project, with appropriate mitigating measures as recommended, would have limited adverse environmental impact. The DEIS evaluates alternatives to the proposal, including system alternatives, route alternatives, and route variations.

The DEIS assesses the potential environmental effects of the construction and operation of the proposed facilities in Mississippi, Alabama, and Florida and State and Federal waters in the Gulf of Mexico. Gulfstream proposes to construct about 744 miles of various diameter pipeline, 128,000 horsepower (hp) of compression, 1 pressure regulating station, 20 meter stations, 4 manifold stations, 12 tie-ins, 26 mainline valve sites, and 26 pig launchers or receivers.

The purpose of the Gulfstream Pipeline Project is to provide natural gas transportation service for up to 1.13 billion cubic feet per day (bcf/d) of natural gas from supply areas in Alabama and Mississippi, across the Gulf of Mexico, for delivery to new markets in central and eastern Florida. The primary market is for natural gas-fueled electric generation plants that are needed to meet the forecasted substantial increases in consumption in Florida driven by projected population growth over the next 10 to 20 years.

Title: Record Keeping and Periodic
Reporting of the Production, Import,
Recycling, Destruction, Transshipment
and Feedstock Use of Ozone-Depleting
Substances, EPA Number 1432.17; OMB
Number 2060-0170; with an extended
expiration date of 1/31/01.

Abstract: The international treaty The
Montreal Protocol on Substances that
Deplete the Ozone Layer (Protocol) and
Title VI of the Clean Air Act (CAA)
establish limits on total U.S. production,
import and export of class I and class II
controlled ozone-depleting substances.
The U.S. is obligated under the Protocol
to cease production and import of class
I controlled substances with exemptions
for essential-uses, previously used
material, and material that will be
transformed, destroyed or exported to
developing countries. The Protocol also
establishes limits and reduction
schedules leading to the eventual
phaseout of class II controlled
substances and methyl bromide with
similar exemptions beyond the
phaseout. The CAA has its own limits
on production and consumption of
controlled substances that EPA must
enforce using the information
submitted.

To ensure U.S. compliance with the
limits and restrictions established by the
Protocol and the CAA, the regulation
establishes control measures for
individual companies. The limits and
restrictions for individual U.S.
companies are monitored by EPA
through the reporting requirements
established in the regulation under 40
CFR Part 82, Subpart A. The
information submitted to EPA is entered
into the Stratospheric Protection
Tracking System. The Tracking System
allows EPA to conduct compliance
monitoring of individual companies, as
well as compliance monitoring for the
U.S. with respect to Protocol obligations
and statutory requirements under the
CAA.

EPA uses the information to direct
special attention to illegal activities
associated with the import of both
newly produced and previously used
controlled substances. Illegal imports
and the avoidance of the tax on these
