

3.20 What Is The Relationship Between Ecological Integrity and Comprehensive Conservation Planning?

We integrate the principles of this policy into all aspects of comprehensive conservation planning as we write plans to direct long range refuge management and identify desired future conditions for planned refuges (602 FW 1.7 D).

3.21 How Do We Protect Ecological Integrity From Actions Outside Of Refuges?

When actions of others that occur off refuge lands or waters that injure or destroy the natural resources of a refuge, refuge managers should address those problems as soon as possible to protect the property of the United States and to protect the biological integrity, biological diversity, and environmental health of the refuge and the System. The refuge manager should first inform the person or entity responsible and request cooperation. Our first effort to avoid and rectify injury should always be partnerships or voluntary cooperation with adjacent landowners and others. If these efforts fail to protect the refuge, refuge managers should request the Office of the Solicitor for assistance in pursuing civil remedies, such as an injunction or damages, just as any other landowner would.
