NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts; Leadership Initiatives Advisory Panel

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), as amended, notice is hereby given that two meetings of the Leadership Initiatives Advisory Panel (AccessAbility and Arts Education sections) to the National Council on the Arts will be held on October 20, 2000 and October 25, 2000 respectively. The panels will meet by teleconference as follows:

AccessAbility Section: from 1 p.m. to 2:30 p.m. in Room 528

Arts Education Section: from 4:30 p.m. to 5:30 p.m. in Room 703 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW, Washington, DC, 20506.

These meetings are for the purpose of Panel review, discussion, evaluation, and recommendations on financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency. In accordance with the determination of the Chairman of May 12, 2000, these sessions will be closed to the public pursuant to subsection (c)(4),(6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Ms. Kathy Plowitz-Worden, Office of Guidelines & Panel Operations, National

Endowment for the Arts, Washington, DC, 20506, or call 202/682-5691.

Dated: October 13, 2000.

Kathy Plowitz-Worden,

Panel Coordinator, Panel Operations, National Endowment for the Arts.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-250 and 50-251; License Nos. DPR-31 and DPR-41]

In the Matter of Florida Power & Light Company (Turkey Point Units 3 and 4); Confirmatory Order Modifying Post-Three Mile Island Requirements Pertaining to Containment Hydrogen Monitors

I

Florida Power & Light Company (FPL or the licensee) is the holder of Facility Operating License Nos. DPR-31 and DPR-41 issued by the Nuclear

Regulatory Commission (NRC or Commission) pursuant to 10 CFR part 50. The licenses authorize the operation of Turkey Point, Units 3 and 4, located in Dade County, Florida.

II

As a result of the accident at Three Mile Island, Unit 2 (TMI-2), the NRC issued NUREG-0737, "Clarification of TMI Action Plan Requirements," in November 1980. Generic Letters 82-05 and 82-10, issued on March 17 and May 5, 1982, respectively, requested licensees of operating power reactors to furnish information pertaining to their implementation of specific TMI Action Plan items described in NUREG-0737. Orders were issued to licensees confirming their commitments made in response to the generic letters. The Confirmatory Order that was issued to FPL on March 14, 1983, required the licensee to implement and maintain the various TMI Action Plan Items, including Item II.F.1 Attachment 6, pertaining to monitoring of the hydrogen concentration in the containment following a safety injection.

The Confirmatory Order of March 14, 1983, imposed requirements upon the licensee to have continuous monitoring of containment hydrogen concentration provided in the control room, as described by TMI Action Plan Item II.F.1, Attachment 6. Information about hydrogen concentration supports the licensee's assessments of the degree of core damage and whether a threat to the integrity of the containment may be posed by hydrogen gas combustion. TMI Action Item II.F.1, Attachment 6 states:

If an indication is not available at all times, continuous indication and recording shall be functioning within 30 minutes of the initiation of safety injection.

The requirement to have monitoring of the hydrogen concentration in the containment within 30 minutes following the start of safety injection has defined both design and operating characteristics for hydrogen monitoring systems at nuclear power plants since the implementation of NUREG-0737. In addition, the technical specifications of most nuclear power plants and NRC regulation 10 CFR 50.44, "Standards for Combustible Gas Control System in Light-Water-Cooled Power Reactors," require availability of hydrogen monitors.

By letter dated June 21, 2000, FPL requested relief for the two Turkey Point units from the requirement to have indication of hydrogen concentration in the containment within 30 minutes of the initiation of safety injection.
