FEDERAL COMMUNICATIONS COMMISSION

47 CFR CH. 1

[FCC 00-401]

Development of Secondary Markets

AGENCY: Federal Communications Commission.

ACTION: Policy statement.

SUMMARY: This document outlines in general terms a series of initiatives that the Commission intends to undertake to promote secondary markets for spectrum. The Commission's current policies concerning transfer, assignment, disaggregation and partitioning of licenses allow certain licensees to market portions of their spectrum to others. In this effort, the Commission seeks to significantly expand and enhance the existing secondary markets for spectrum and radio communications services to permit spectrum to flow more freely among users and uses in response to economic demand, to the extent consistent with our other statutory mandates and public interest objectives.

FOR FURTHER INFORMATION CONTACT: Lisa Gaisford, Office of Engineering and Technology, (202) 418-7280.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Policy Statement*, FCC 00-401, adopted November 9, 2000, and released December 1, 2000. Summary of the Policy Statement

The Commission adopted a Policy Statement setting forth the Commission's plans for facilitating secondary markets for radio spectrum that will allow and encourage licensees to make all or portions of their

frequencies and/or service areas available to other entities and uses. The Commission envisions that secondary markets can flourish by facilitating arrangements such as leasing, franchising, and joint operating agreements, and improving the conditions for transferability of spectrum through, for example, partitioning or disaggregation. The Policy Statement outlines in general terms a series of initiatives that the Commission intends to undertake to promote secondary markets for spectrum. The Commission's current policies concerning transfer, assignment, disaggregation and partitioning of licenses allow certain licensees to market portions of their spectrum to others. In this new effort, the Commission seeks to significantly expand and enhance the existing secondary markets for spectrum and radio communications services to permit spectrum to flow more freely among users and uses in response to economic demand, to the extent consistent with our other statutory mandates and public interest objectives.
