Abstract: The FR 2436 collects derivatives market statistics from a sample of nine large U.S. dealers of over-the-counter (OTC) derivatives. Data are collected on notional amounts and gross market values of the volumes of broad categories of foreign exchange, interest rate, equity- and commodity-linked OTC derivatives instruments across a range of underlying currencies, interest rates, and equity markets.

This collection of information complements the ongoing triennial Survey of Foreign Exchange and Derivatives Market Activity (FR 3036). The FR 2436 collects similar data on the outstanding volume of derivatives, but not on derivatives turnover. As with the FR 3036, the Federal Reserve conducts this report in coordination with other central banks and forwards the aggregated data furnished by U.S. reporters to the Bank of International Settlements (BIS), which publishes global market statistics that are aggregations of national data.
