POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

INS Image Storage and Retrieval System (ISRS) information is stored on magnetic media (internal image server disk drives).

RETRIEVABILITY:

Individual records are indexed and retrievable by name, alien registration number (A-number), and application receipt number. In cases where an individual record can not be retrieved by one of these key indexes, combinations of multiple data elements may be used (*e.g.* name, date of birth, and country of birth) if necessary, to assist in the identification and retrieval of a unique record.

SAFEGUARDS:

Most INS offices are located in buildings under security guard, with access limited to INS and other Federal

Government employees and authorized visitors. All records are stored in spaces which are locked outside of normal office hours at the Department of Justice Data Center. The automated equipment is physically accessible only by authorized Department of Justice personnel. Electronic access to the automated system is controlled by restricted password for use at remote terminals in secured areas.

RETENTION AND DISPOSAL:

Image Storage and Retrieval System data records are retained in the system for a period of 75 years and then destroyed.
