d. *Applicant:* Portland General Electric Company (PGE).

e. *Name of Project:* Round Butte & Pelton Project.

f. *Location:* The project is located on the Deschutes River in Jefferson County, Oregon, in part on federal lands, including tribal lands within the Warm Springs Indian Reservation.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. § 791(a)-825(r).

h. *Applicant Contact:* Julie Keil, Director, Hydro Licensing, Portland General Electric Company, 121 SW Salmon Street, 3WTC-BRHL, Portland, OR 97204, (503) 464-8864.

i. *FERC Contact:* Any questions on this notice should be addressed to Mr. Mohamad Fayyad (202) 219-2665 or by e-mail at mohamad.fayyad@ferc.fed.us.

j. *Deadline for filing comments and/or motions:* March 23, 2001.

All documents (original and eight copies) should be filed with: David P. Boergers, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. Comments and protests may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site at <http://www.ferc.fed.us/efi/doorell.htm>.

Please include the project number (2030-033) on any comments or motions filed.

k. *Description of Filing:* PGE proposes to replace the runners on two of the three turbines at the Round Butte Development of the project. The proposed new runners will have a maximum hydraulic capacity of 4,700 cfs at 345 ft net head, which represents an approximate 3% increase in the maximum hydraulic capacity of the turbines. The existing turbines are operated in their high efficiency range and the upgrade units would be operated in a similar manner. The capacity of the Round Butte Development would not change because it is limited by the generator capacity. Installation of new runners would provide increased flexibility in system load following and spinning reserve capability, and could alleviate some of the shortages in energy currently being experienced in that part of the Nation.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE, Room 2A, Washington, DC 20426, or by calling (202) 208-1371. k. Calligan Creek Hydro Inc., has applied for license amendment to the Calligan Creek Hydroelectric Project. The current license for the project was issued on May 13, 1993. An order amending the license was issued on June 2, 1994, approving the change from an overhead transmission line to a buried one. On April 10, 1995, the Commission issued an order granting an extension of time for the construction of the project commencement date of May 13, 1997 and construction completion on May 13, 1999. On March 24, 1999, the Commission issued another order extending the date for the projects construction commencement and construction completion to May 13, 2001 and May 13, 2003, respectively. No project facilities have been constructed to date.

The licensee has requested an amendment to change the project capacity from 5.4 MW to 7.4 MW with a 36 percent increase in hydraulic capacity to allow maximum power production during high flows; modify the intake and diversion structures to accommodate the increased flow needed to support the increased generation capacity, including an increase of surface area to the fish screens; bury the

first 2,000 feet of the penstock to a depth of about 100 feet to eliminate the need for the approved siphon; and change the current tailrace design from a 140-foot-long buried pipe to an approximately 100-foot-long open channel.
