SUPPLEMENTARY INFORMATION:

Title: Importation of Fruits and Vegetables.

OMB Number: 0579-0128.

Expiration Date of Approval: January 31, 2001.

Type of Request: Reinstatement of an expired information collection.

Abstract: The United States Department of Agriculture (USDA) is responsible for preventing plant pests from entering the United States and controlling and eradicating plant pests in the United States. The Plant Protection Act authorizes the Department to carry out this mission. The Plant Protection and Quarantine (PPQ) program of USDA's Animal and Plant Health Inspection Service is responsible for implementing the regulations that carry out the intent of this Act. The regulations in "Subpart—Fruits and Vegetables" (7 CFR 319.56 through 319.56-8) prohibit or restrict the importation of fruits and vegetables into the United States from certain parts of the world to prevent the introduction and dissemination of plant pests, including fruit flies, that are new to or not widely distributed within the United States.

The regulations in § 319.56-2w allow papayas to be imported into the continental United States, Alaska, Puerto Rico, and the U.S. Virgin Islands from certain regions of Brazil and Costa Rica under specified conditions. Allowing papayas to be imported necessitates the use of certain information collection activities, including completing phytosanitary inspection certificates, maintaining fruit fly monitoring records, and marking the cartons.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1 hour per response.

Respondents: Growers of papayas in Brazil and Costa Rica and full-time, salaried plant health officials of Brazil and Costa Rica.

Estimated annual number of respondents: 50.

Estimated annual number of responses per respondent: 10.

Estimated annual number of responses: 500.

Estimated total annual burden on respondents: 500 hours.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 16th day of March 2001.

Bobby R. Acord,

Acting Administrator, Animal and Plant Health Inspection Service.
