

2.83 rem TEDE. These doses are less than the TEDE limit of 5 rem contained in 10 CFR 50.67 and are, therefore, acceptable. Therefore, the proposed action would not result in a significant onsite radiological impact to the human environment.

The proposed action to change the TS and to change the licensing and design bases with respect to the FHA will not increase the probability or consequences of accidents, no significant changes are being made in the types or amounts of any effluents that may be released offsite, and there is no significant increase in occupational or public radiation exposure. Therefore, the NRC concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not involve any historic sites. The proposed action does not involve any physical features of the plant or procedure changes involving a potential nonradiological release. Thus, the proposed action does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

As an alternative to the proposed action, the NRC staff considered denial of the proposed action (i.e., the "no action" alternative). Denial of the application would not result in a significant improvement in current environmental impacts. The

environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the "Final Environmental Statement Relating to the Operation of Duane Arnold Energy Center," dated March 1973.

Agencies and Persons Consulted

In accordance with its stated policy, the NRC staff consulted with the Iowa State official, Mr. D. Fleeter of the Department of Public Health, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of no Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the application dated October 19, 2000, as supplemented by letters dated November 16, 2000, and April 9, 2001, and as limited in scope by letter dated March 23, 2001. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the ADAMS Public Library component on the NRC Web site, <http://www.nrc.gov> (the Electronic Reading Room).

Dated at Rockville, Maryland, this 11th day of April 2001.

For the Nuclear Regulatory Commission.

Darl S. Hood,

Senior Project Manager, Section 1, Project Directorate III, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Application for a License To Import Radioactive Waste

Pursuant to 10 CFR 110.70(c) "Public notice of receipt of an application," please take notice that the Nuclear Regulatory Commission has received the following application for an import license. Copies of the application are available electronically through ADAMS and can be accessed through the Public Electronic Reading Room (PERR) link <<http://www.nrc.gov/NRC/ADAMS/index.html>> at the NRC Homepage.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington DC 20555; the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555; and the Executive Secretary, U.S. Department of State, Washington, DC 20520.

The information concerning the application follows:

NRC IMPORT LICENSE APPLICATION

Name of applicant Date of application Date received Application No.	Description of material			
	Material type	Total Qty.	End use	Point of origin
Allied Class Technology Group December 22, 2000; March 22, 2001 (Revised) December 28, 2000; March 23, 2001. IW011	Class A radioactive waste. Scrap metal contaminated with Cobalt 60 and Cesium-137.	3,000 tons	Decontamination of metals for recycle or solid waste disposal. Secondary low-level radioactive waste generated from processing will be disposed of at US Ecology facility in Richland, WA.	Taiwan.

For the Nuclear Regulatory Commission.

Dated this 9th day of April 2001 at Rockville, Maryland.

Ronald D. Hauber,

Deputy Director, Office of International Programs.
