**DEPARTMENT OF TRANSPORTATION**

**Federal Aviation Administration**

**Associate Administrator for Commercial Space Transportation; Notice of Availability of a Draft Environmental Assessment (EA) for Proposed Issuance of a Launch Operator License (LOL) or Launch Specific Licenses to Sea Launch Limited Partnership (SLLP)**

**AGENCY:** Federal Aviation Administration (FAA), Associate Administrator for Commercial Space Transportation (AST).

**ACTION:** Notice of availability.

**SUMMARY:** In accordance with Executive Order 12114, the implementation of which is guided by the National Environmental Policy Act (NEPA), the FAA is initiating a 30-day public review and comment period of a Draft Environmental Assessment (EA) for proposed issuance of a launch operator license (LOL) or launch specific licenses to Sea Launch Limited Partnership (SLLP). If issued, the LOL would authorize SLLP to conduct, within certain launch parameters, up to eight commercial launches per year for five years without having to apply for a separate license for each launch. These launches would all be equatorial and would use azimuths between 82.6° and 97.4°, inclusive, originating from the SLLP Launch Platform (LP) at 0° latitude and 154° West (W) longitude, which is 425 kilometers (266 miles) from Kiritimati (Christmas Island) in the Kiribati Island Group in the Pacific Ocean. This Draft EA also addresses the proposed issuance of a launch-specific license for the launch of a Galaxy IIC

payload as well as other proposed launch specific licenses within the defined azimuth range and other specified launch parameters should the proposed LOL not be issued or be delayed. As a foreign entity in which a U.S. citizen has a controlling interest, in order to conduct commercial launch operations SLLP must obtain a license from FAA. Copies of the draft document are available through AST's Website (<http://ast.faa.gov/>) or by contacting Ms. Michon Washington at the address listed below.

**DATES:** The official comment period will begin with publication of this Notice of Availability. The comment period will end June 18, 2001.

**FOR FURTHER INFORMATION CONTACT:** Questions about the license applicant's proposed action and the Draft EA may be addressed to Ms. Michon Washington, Office of the Associate Administrator for Commercial Space Transportation, Space System Development Division, Suite 331/AST-100, 800 Independence Avenue SW., Washington, DC 20591; email [michon.washington@faa.gov](mailto:michon.washington@faa.gov) or phone (202) 267-9305. Written comments regarding the Draft EA should be sent to the same mailing address.

*Additional Information:* Under the license applicant's proposed action, the FAA would issue a license to SLLP to conduct (1) Up to eight launches per year over a five-year period, for a maximum of 40 launches; (2) from a launch site at 0° latitude and 154° W longitude; (3) within a range of launch azimuths from 82.6° to 97.4°, inclusive; (4) using a Zenit-3SL launch vehicle; and (4) transporting specified classes of payloads. The FAA is also evaluating the possibility of issuing a launch-specific license to SLLP for the launch of Galaxy IIC, as well as other potential launch-specific licenses (not to exceed eight per year) as necessary should the proposed LOL not be issued or be delayed. The proposed launch-specific licenses would authorize SLLP to conduct specific launches (1) From a launch site at 0° latitude and 154° W longitude; (2) for a launch along an azimuth of 90.0°; (3) using a Zenit-3SL launch vehicle; and (4) transporting specified classes of payloads.

The FAA is considering six alternatives to the license applicant's proposed action. Three of these alternatives were briefly considered and dismissed as not fulfilling the purpose and need of the proposed action. They include: (1) Increasing the annual number of launches to a range of up to 12 per year; (2) using a range of azimuths from 70° to 110° (identified as
