Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639-7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project

National Telephone Survey of Urban Mosquito Control Programs—New—National Center for Infectious Disease (NCID), Centers for Disease Control and Prevention (CDC). West Nile virus is a mosquito-borne virus that is native to the eastern hemisphere, where it recently caused large epidemics of human disease in eastern Europe, Russia, and the Middle East. In 1999, West Nile virus first appeared in the United States when it caused an epidemic of mosquito-borne encephalitis and meningitis in the greater New York City metropolitan area. During 1999-2000, 83 persons (mostly senior citizens) with West Nile viral disease and 9 fatalities were reported in New York, New Jersey, and Connecticut. The apparent primary vector to humans was the house mosquito, *Culex pipiens*, which occurs in virtually all urban areas of the United States. This species is also one of the principal vectors of St. Louis encephalitis virus, historically the most important cause of epidemic viral encephalitis in the United States, and a close relative of West Nile virus. Based on the detection of West Nile virus in
