Public Water System Supervision Program Revision for the State of Texas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of tentative approval.

SUMMARY: Notice is hereby given that the State of Texas is revising its approved Public Water System

Supervision Program. Texas has adopted an Interim Enhanced Surface Water Treatment Rule to improve control of microbial pathogens in drinking water, including specifically the protozoan *Cryptosporidium*, and a Stage 1 Disinfectant/Disinfection Byproducts Rule, setting new requirements to limit the formation of chemical disinfectant byproducts in drinking water. Texas has also adopted drinking water regulations requiring consumer confidence reports from all community water systems, has adopted a revised definition for public water system, and has revised Texas administrative penalty authority. EPA has determined that these revisions are no less stringent than the corresponding federal regulations. Therefore, EPA intends to approve these program revisions.
