

environmental impact. Accordingly, the Commission concludes that there are no significant nonradiological impacts associated with the proposed action.

#### *Alternatives to the Proposed Action*

Since the Commission has concluded that there is no discernible environmental impact associated with the proposed action, any alternatives with equal or lesser impact need not be evaluated. As an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the proposed action would result in no change in environmental impacts and would result in hardship to USEC, DOE, and perhaps other participants. The environmental impacts of the proposed action and the alternative action are similar.

#### *Alternative Use of Resources*

The proposed action does not involve the use of any resources beyond those already necessary to conduct the EP exercise during 2001, and would merely delay the exercise.

#### *Agencies and Persons Consulted*

In accordance with its stated policy, the NRC staff consulted with State of Ohio official, Carol O'Claire, Supervisor, Radiological Branch, Ohio Emergency Management Agency, and U.S. Department of Energy official Randall M. DeVault, Group Leader, Transition and Technology Group, Office of Nuclear Fuel Security and Uranium Technology, regarding the environmental impact of the proposed action. No objections were received.

Consultations with the U.S. Fish and Wildlife Service and the State Historic Preservation Officer were not performed because of the lack of any conceivable impact to fish and wildlife or historic assets.

#### *Finding of No Significant Impact*

Based on the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

#### *List of Preparers*

This document was prepared by Dan E. Martin, Project Manager, Special Projects Branch, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards. Mr. Martin is the Project Manager for the Portsmouth Gaseous Diffusion Plant.

For further details with respect to the proposed action, see the USEC letter

## **NUCLEAR REGULATORY COMMISSION**

### **Regulatory Guide; Issuance, Availability**

The Nuclear Regulatory Commission has issued revisions of two guides in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

Revision 2 of Regulatory Guide 1.142, "Safety-Related Concrete Structures for Nuclear Power Plants (Other than Reactor Vessels and Containments)," provides guidance on methods acceptable to the NRC staff for complying with the NRC's regulations on the design, evaluation, and quality assurance of safety-related nuclear concrete structures, excluding concrete reactor vessels and concrete containments.

Revision 2 of Regulatory Guide 1.143, "Design Guidance for Radioactive Waste Management Systems, Structures, and Components Installed in Light-Water-
