**SUPPLEMENTARY INFORMATION:**

*Title:* Customer Satisfaction Surveys.

*Abstract:* Executive Order 12862, "Setting Customer Service Standards" requires that Federal agencies provide the highest quality service to our customers by identifying them and determining what they think about our services and products. The surveys covered in this request for a generic clearance will provide the FHWA a means to gather this data directly from our customers. The information obtained from the surveys will be used to assist in evaluating service delivery and processes. The responses to the surveys will be voluntary and will not involve information that is required by regulations. There will be no direct costs to the respondents other than their time. The FHWA plans to provide an electronic means for responding to the majority of the surveys via the World Wide Web.

*Survey Frequency and Respondents:* A total of 31 agency-wide customer satisfaction surveys are planned over the next 3 years. The survey frequency varies from one-time to annually. For all 31 surveys, there will be approximately 55,500 respondents, including State and local governments, highway industry organizations and the general public.

*Estimated Total Annual Burden Hours:* The burden hours per response will vary with each survey. A few of the surveys will require approximately 30 minutes each to complete; however, the majority of them will take from 5 to 20 minutes each. We estimate a total of 12,000 annual burden hours for all of the surveys.

**DEPARTMENT OF VETERANS AFFAIRS****Privacy Act of 1974; System of Records**

**AGENCY:** Department of Veterans Affairs.

**ACTION:** Notice of Amendment of System of Records "Health Care Provider Credentialing and Privileging Records—VA".

**SUMMARY:** The Privacy Act of 1974 (5 U.S.C. 552(e)(4)) requires that all agencies publish in the **Federal Register** a notice of the existence and character of their systems of records. The Department of Veterans Affairs (VA) is amending the system of records, known as "Health Care Provider Credentialing and Privileging Records-VA" (77VA11) as set forth in the **Federal Register** 55 FR 30790 dated 7/27/90. VA is changing the system number to 77VA10Q and amending the system notice by revising the paragraphs on System Location; Categories of Individuals Covered by the System; Categories of Records in the System; Purposes; Routine Uses; Storage; Retrievability; Safeguards; System Manager(s) and Address. VA is republishing the system notice in its entirety at this time.

**DATES:** Comments on the amendment of this system of records must be received no later than January 7, 2002. If no public comment is received, the changes will become effective January 7, 2002.

**ADDRESSES:** Written comments concerning the proposed amendment of the system of records may be submitted to the Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420. Comments will be available for public inspection at the above address in the Office of Regulations Management, Room 1158, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays).

**FOR FURTHER INFORMATION CONTACT:** Veterans Health Administration (VHA) Privacy Act Officer, Department of Veterans Affairs, 810 Vermont Ave., NW., Washington, DC 20420, (727) 320-1839.

**SUPPLEMENTARY INFORMATION:** VA is renumbering the system of records from 77VA11 to 77VA10Q to reflect organizational changes in the Department. In addition, VA has decided, as a matter of policy, to automate and provide direct, on-line, remote access to data on the credentialing of health care practitioners appointed or otherwise utilized by the VHA. The automation and on-line access to credentialing data improves the quality, timeliness, and reliability of the credentialing process; promotes inter-facility sharing of health care resources; supports national readiness; facilitates the establishment of telemedicine initiatives; simplifies the process for covered health care practitioners; and reduces costs. An electronic credentials data file can cross facility and network boundaries and eliminate duplication.
