

have addressed and resolved their comments.

While we developed only one standard for portal monitors, we developed guidance for four (4) types of portable instruments because of the instrument-specific factors that influence the manner in which radiation is detected and measured. We developed the guidance for portable instruments through extensive empirical tests of different portable radiological instruments currently in use today by State and government personnel. Despite instrument-specific differences between portal monitors and portable instruments, use of the draft guidance will afford protection to individuals equivalent to that afforded by the portal monitor standard.

Based on extensive consultation with Federal and State officials, the primary issue involving this guidance is the extended period of time required to monitor an individual adequately with some types of portable radiological instruments. The planning criterion set forth in this document for monitoring individuals using a portable CDV-700 radiological instrument is 300 counts per minute (CPM) above background levels. Empirical studies undertaken since 1991 have substantiated per-person monitoring time frames for different types of radiological instruments ranging from 2.6 minutes to as high as 19 minutes (for a CDV-700 with standard GM side window probe) for total body scans to detect spot contamination.

The range of times required to monitor individuals, coupled with the need of State and local governments to provide sufficient resources to monitor at least 20% of the plume exposure pathway emergency planning zone (EPZ) population, may require State and local governments with certain types of radiological instruments to re-examine their radiological emergency planning and preparedness for accidents involving commercial nuclear power plants. This issue is extensively documented and addressed in the three documents previously cited, and we provide suggestions on how State and local governments may address this issue and related resource requirements.

We welcome comments on the monitoring issue, related resource requirements, and any other issues raised by the draft guidance.

Dated: December 7, 2001.

Joe M. Allbaugh,
Director.

BILLING CODE 6718-02-P

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Commission hereby gives notice of the filing of the following agreement(s) under the Shipping Act of 1984. Interested parties can review or obtain copies of agreements at the Washington, DC offices of the Commission, 800 North Capitol Street, NW., Room 940. Interested parties may submit comments on an agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days of the date this notice appears in the **Federal Register**.

Agreement No.: 011548-005.

Title: Hanjin/Sinolines Cross Space Charter & Sailing Agreement.

Parties: Hanjin Shipping Co., Ltd. Sinotrans Container Lines Co. Ltd.

Synopsis: The proposed modification substitutes Sinotrans Container Lines Co., Ltd., trading as Sinolines, for China National Foreign Trade Transportation Corporation as a party to the agreement.

Agreement No.: 011746-001.

Title: COSCON/KL/YMUK Asia/U.S. Pacific Coast Slot Allocation Agreement.

Parties: COSCO Container Lines Company, Ltd. Kawasaki Kisen Kaisha, Ltd. Yangming (UK) Ltd.

Synopsis: The proposed modification adds a new vessel string in the agreement trade on which the parties may share space. The parties request expedited review.

By Order of the Federal Maritime Commission.

Dated: December 7, 2001.

Theodore A. Zook,

Assistant Secretary.
