Endangered and Threatened Wildlife; Sea Turtle Conservation Requirements

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Public hearing notice; extension of public comment period.

SUMMARY: Notice is hereby given that the National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce, will extend the public comment period, through February 15, 2002, for the purpose of receiving comments on the proposed rule to amend the regulations protecting sea turtles to enhance their effectiveness in reducing sea turtle mortality resulting from shrimp trawling in the Atlantic and Gulf Areas of the southeastern United States, published in the **Federal Register** on October 2, 2001.

DATES: Written comments should be received by February 15, 2002.

ADDRESSES: Written comments should be addressed to the Chief, Endangered Species Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910. Comments may also be sent via fax to 301-713-0376. Comments will not be accepted if submitted via e-mail or the Internet.

Therese.Conant@noaa.gov).

SUPPLEMENTARY INFORMATION: Turtle excluder devices (TEDs) have proven to be effective at excluding sea turtles from shrimp trawls; however, NMFS has determined that modifications to the design of TEDs need to be made to exclude leatherbacks and large, sexually

mature loggerhead and green turtles. Several approved TED designs are also structurally weak and do not function properly under normal fishing conditions. Additionally, modifications to the trynet and bait shrimp exemptions to the TED requirements are necessary to decrease lethal take of sea turtles. These proposed amendments are necessary to protect endangered and threatened sea turtles in the Atlantic and Gulf Areas.

Endangered and Threatened Wildlife and Plants: 90-Day Finding for a Petition to List North American Green Sturgeon as Threatened or Endangered under the Endangered Species Act

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of petition finding; request for information and comments.

SUMMARY: NMFS announces a 90-day finding for a petition to list the North American green sturgeon (*Acipenser medirostris*) as a threatened or endangered species and to designate critical habitat under the Endangered Species Act (ESA). NMFS finds that the petition presents substantial scientific information indicating that the petitioned action may be warranted. NMFS will conduct a status review of the green sturgeon to determine if the petitioned action is warranted. To ensure that the review is comprehensive, NMFS is soliciting information and comments pertaining to this species, and seeks suggestions from the public for peer reviewers for the agency's review of the petitioned action.

DATES: Information and comments on the action must be received by March 14, 2002.

ADDRESSES: Requests for copies of the petition, and information and comments on this action should be submitted to

the Assistant Regional Administrator, Protected Resources Division, NMFS, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802-4213. The petition is available for public inspection by appointment, Monday through Friday, at the same address.

FOR FURTHER INFORMATION CONTACT:

Craig Wingert, NMFS, Southwest Region, (562) 980-4021 or David O'Brien, NMFS, Office of Protected Resources, (301) 713-1401.

SUPPLEMENTARY INFORMATION:

Background

Section 4 (b)(3)(A) of the ESA (16 U.S.C. 1531 *et seq.*) requires that NMFS make a finding as to whether a petition to list, delist, or reclassify a species presents substantial scientific or commercial information to indicate that the petitioned action may be warranted. NMFS' ESA implementing regulations (50 CFR 424.14) define "substantial information" as the amount of information that would lead a reasonable person to believe that the measure proposed in the petition may be warranted. In determining whether substantial information exists for a petition to list a species, NMFS takes into account several factors, including information submitted with and referenced in the petition and all other information readily available in NMFS files. To the maximum extent practicable, this finding is to be made within 90 days of the receipt of the petition, and the finding is to be published promptly in the **Federal Register**. If NMFS finds that a petition presents substantial information indicating that the requested action may be warranted, section 4 (b)(3)(B) of the ESA requires the Secretary of Commerce (Secretary) to conduct a status review of the species and make a finding as to whether the petitioned action is warranted within 1 year of the receipt of the petition.

Analysis of Petition

On June 12, 2001, NMFS received a petition from the Environmental Protection Information Center, Center for Biological Diversity, and Waterkeepers Northern California regarding the North American green sturgeon. The petition requested that NMFS list the North American green sturgeon as either an endangered or threatened species under the ESA, and that it designate critical habitat for the species concurrently with any listing determination.

The green sturgeon is a large, anadromous fish. In North America, the green sturgeon ranges from Alaska to
