

Start Time of Meeting: Approximately 10:00 a.m.

FOR FURTHER INFORMATION CONTACT:

Lieutenant Colonel Edward C. Clarke, United States Military Academy, West Point, NY 10996-5000, (845) 938-4200.

SUPPLEMENTARY INFORMATION: *Proposed Agenda:* Organizational Meeting of the Board of Visitors. Review of the Academic, Military and Physical Programs, and the Bicentennial Campaign at the USMA. All proceedings are open.

Edward C. Clarke,

Lieutenant Colonel, U.S. Army, Executive Secretary, USMA Board of Visitors.

Availability for Non-Exclusive, Exclusive, or Partially Exclusive Licensing of U.S. Patent Concerning Method and Kit for Detection of Dengue Virus

AGENCY: U.S. Army Medical Research and Materiel Command, DOD.

ACTION: Notice.

SUMMARY: In accordance with 37 CFR 404.6, announcement is made of the availability for licensing of U.S. Patent No. 6,190,859 entitled "Method and Kit for Detection of Dengue Virus" issued 02/20/01. This patent has been assigned to the United States Government as represented by the Secretary of the Army.

ADDRESSES: Commander, U.S. Army Medical Research and Materiel Command, ATTN: Command Judge Advocate, MCMR-JA, 504 Scott Street, Fort Detrick, Frederick, Maryland 21702-5012.

FOR FURTHER INFORMATION CONTACT: For patent issues, Ms. Elizabeth Arwine, Patent Attorney, (301) 619-7808. For licensing issues, Dr. Paul Mele, Office of Research & Technology Assessment, (301) 619-6664. Both at telefax (301) 619-5034.

SUPPLEMENTARY INFORMATION: An inactivated dengue virus vaccine to immunize and protect humans against dengue fever is described. The vaccine is based on dengue viruses which have been propagated to high titers in suitable cells, purified and inactivated under conditions which destroy infectivity but preserve immunogenicity, a high level of which is demonstrated in animal models. Uses of the inactivated dengue virus for

detecting antibodies to dengue and kits therefore are also described.

Luz D. Ortiz,

Army Federal Register Liaison Officer.

Availability for Non-Exclusive, Exclusive, or Partially Exclusive Licensing of U.S. Patent Concerning DNA Vaccines Against Tick-Borne Flaviviruses

AGENCY: U.S. Army Medical Research and Materiel Command, DOD.

ACTION: Notice.

SUMMARY: In accordance with 37 CFR 404.6, announcement is made of the availability for licensing of U.S. Patent No. 6,258,788 entitled "DNA Vaccines Against Tick-Borne Flaviviruses" issued 07/10/01. Foreign rights also available (PCT/US98/25322). This patent has been assigned to the United States Government as represented by the Secretary of the Army.

ADDRESSES: Commander, U.S. Army Medical Research and Materiel Command, ATTN: Command Judge Advocate, MCMR-JA, 504 Scott Street, Fort Detrick, Frederick, Maryland 21702-5012.

FOR FURTHER INFORMATION CONTACT: For patent issues, Ms. Elizabeth Arwine, Patent Attorney, (301) 619-7808. For licensing issues, Dr. Paul Mele, Office of Research & Technology Assessment, (301) 619-6664. Both at telefax (301) 619-5034.

SUPPLEMENTARY INFORMATION: Particle mediated immunization of tick-borne *flavivirus genes* confers homologous and heterologous protection against tick borne encephalitis.

Luz D. Ortiz,

Army Federal Register Liaison Officer.

Availability for Non-Exclusive, Exclusive, or Partially Exclusive Licensing of U.S. Patent Concerning Indolo[2,1-b]quinazoline-6, 12-dione Antimalarial Compounds and Methods of Treating Malaria

AGENCY: U.S. Army Medical Research and Materiel Command, DOD.

ACTION: Notice.

SUMMARY: In accordance with 37 CFR 404.6, announcement is made of the availability for licensing of U.S. Patent No. 6,284,772 entitled "Indolo[2,1-b]quinazoline-6, 12-dione antimalarial compounds and Methods of Treating Malaria" issued 09/04/01. Foreign rights are also available (PCT/US99/22569). This patent has been assigned to the United States Government as represented by the Secretary of the Army.

ADDRESSES: Commander, U.S. Army Medical Research and Materiel Command, ATN: Command Judge Advocate, MCMR-JA, 504 Scott Street, Fort Detrick, Frederick, Maryland 21702-5012.

FOR FURTHER INFORMATION CONTACT: For patent issues, Ms. Elizabeth Arwine, Patent Attorney, (301) 619-7808. For licensing issues Dr. Paul Mele, Office of Research & Technology Assessment, (301) 619-6664. Both at telefax (301) 619-5034.

SUPPLEMENTARY INFORMATION:

Compounds, compositions and methods are provided for treating malaria parasites in vitro and in vivo by administering indolo [2,1-b]quinazoline-6, 12-dione compounds of Formula 1. On Formula 1 A, B, C, D, E, F, G and H are independently selected from carbon and nitrogen, or A and B or C and D can be taken together to be nitrogen or sulfur, with the proviso that not more than three of A, B, C, D, E, F, G and H are other than carbon; wherein R1 through R8 are independently selected from the group consisting of, but not limited to, the halogens, alkyl groups, trifluoromethyl groups, methoxyl groups, the carboxy methyl or carboxy ethyl group, nitro, aryl, heteroaryl, cyano, amino, dialkylaminoalkyl, 1-(4-alkylpiperazinyl), and the pharmaceutically acceptable salts thereof; and wherein X is independently selected from the group consisting of any atom especially oxygen, or any side chain necessary to make the indolo[2,1-b]quinazoline-6, 12-dione compound a "prodrug" as the term is understood by one of ordinary skill in the art of medicinal chemistry. In other words, a side chain having a structure where a carbon-nitrogen double bond bears substituents that make the prodrug more water soluble and bioavailable.

Luz D. Ortiz,

Army Federal Register Liaison Officer.
