The Proposal

The FAA is considering an amendment to 14 CFR part 71 by modifying the Class E airspace area at Daggett, CA. The establishment of a RNAV (GPS) RWY 22 SIAP and a RNAV (GPS) RWY 26 SIAP at Barstow-Daggett Airport has made this proposal necessary. Additional controlled airspace extending upward from 700 feet above the surface is needed to contain aircraft executing RNAV (GPS) RWY 22 SIAP and a RNAV (GPS) RWY 26 SIAP to Barstow-Daggett Airport. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the RNAV (GPS) RWY 22 SIAP and a RNAV (GPS) 26 SIAP to Barstow-Daggett, Daggett, CA. Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9J dated August 31, 2001, and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significantly regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The Proposed Amendment

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9J, Airspace Designations and Reporting Points, dated August 31, 2001 and effective September 16, 2001, is amended as follows:

Proposed Amendment of Class E Airspace; Cold Bay, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to amend Class E airspace at Cold Bay, AK. Due to the development of an Area Navigation (RNAV) Global Positioning System (GPS) Runway (Rwy) 26 Instrument Approach Procedure for the Cold Bay airport, additional Class E airspace to protect Instrument Flight

Rules (IFR) operations is needed. The additional Class E surface area airspace will ensure that aircraft executing the RNAV (GPS) Rwy 26 standard instrument approach procedure remain within controlled airspace. Adoption of this proposal would result in additional Class E airspace at Cold Bay, AK.

DATES: Comments must be received on or before March 25, 2002.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Operations Branch, AAL–530, Docket No. 01–AAL–2, Federal Aviation Administration, 222 West 7th Avenue, Box 14, Anchorage, AK 99513–7587.

The Proposal

The FAA proposes to amend 14 CFR part 71 by adding Class E airspace at Cold Bay, AK. The intended effect of this proposal is to add Class E controlled airspace necessary to contain IFR operations at Cold Bay, AK.

The FAA is adding a standard instrument approach procedure to the Cold Bay airport, Runway 26. This runway did not previously have an instrument approach procedure, although there are standard instrument approach procedures to other runways. The airspace currently designated as Class E is sufficient for all existing approaches, but does not contain the new standard instrument approach procedure to Runway 26.

The proposed Class E Airspace would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1200 foot transition areas are published in
